POORNIMA
COLLEGE OF ENGINEERING

- ABOUT INSTITUTE**
- Poornima College of Engineering (PCE), established as a brand of Technical Education in the year 2000, has its own glorious legacy of leading the young engineers to the mammoth sky of success. Its accomplishments forecast its journey through the hardships and its triumph over them one after another. PCE left no stone unturned since its establishment in turning the glorious vision into unbelievable reality providing the platform for knowledge and research and their practical implementations in different engineering professional prospects. Glorious glimpses of PCE:
- Highly recognized and renowned affiliated technical institution all over Rajasthan with built up area more than 3.5 lacs square feet
 - Affiliated to RTU, Kota & approved by AICTE, New Delhi
 - The most preferred NBA Accredited Engineering College with running of six specializations of Engineering at UG Level (CSE, ECE, EE, ME, IT, CIV) and two at PG level (CS & VLSI)
 - The only institution permitted by RTU to admit FNI/PIO/Gulf students & designated as centre of excellence by IBM
 - An excellent institution building its rapport in all sectors of education, research and development

ABOUT DEPARTMENT

The Department of Computer Engineering was established in July 2000. It administers bachelor's programs in Computer Engineering, as well as master's degree programs in Computer Science. The department is accredited by National Board of Accreditation for quality and outcome based education. The department's strengths include its high faculty-to-student ratio, state of the art facilities, renowned faculty, strong focus on undergraduate education balanced with leading-edge research, and emphasis on leadership, service and ethics. The Department aims at imparting quality education and strives to quench the thirst for knowledge. The Department lays emphasis on theoretical and practical aspects of subjects taught viz. Computer Technologies, Data Structures, and Information Security, Machine Learning, IOT, BigData, Cloud Computing, Networking, Database Management, Software Engineering, Operating System, Programming Languages and several other domains of computer engineering.

- TOPICS TO BE COVERED**
- Introduction to Machine Learning and Artificial Intelligence
 - Mathematics for Machine Learning
 - Types of Machine Learning, and Application of Supervised Learning and Unsupervised learning
 - Linear and Logistics Regression.
 - Machine Learning and its Impact on Real Time Application.
 - Exploratory and Data Analysis.
 - Implementation of Smart Contract Using Solidity.
 - Block Chain in Digital Forensics.
 - Emerging Trends in Data Science and Application.
 - How to Write a Research Paper, Book Chapter, and a Creative idea for filling Patent.

- INSTRUCTIONS:**
- Faculty/Research Scholars from India and outside of India
 - No Registration Fees
 - Last Date of Registration: 31/07/23
 - E-Certificates will be provided after successful completion of FDP

SESSION 1

DAY-1
AUGUST 1 2023
9:30 AM-11:00 AM

MATHEMATICS FOR MACHINE LEARNING

DR. SURENDER HANS,
ASSOCIATE PROFESSOR, PCE
JAIPUR

SESSION 2

DAY-1
AUGUST 1 2023
1:00 PM-2:30 PM

ASPECT BASED SENTIMENT ANALYSIS

DR. GANPAT SINGH CHAUHAN,
ASSISTANT PROFESSOR,
MANIPAL UNIVERSITY, JAIPUR

SESSION 3

DAY-2
AUGUST 2 2023
9:30 AM-11:00 AM

MACHINE LEARNING ALGORITHMS

DR. JOE ARUN RAJA
PONNUSAMY, ASSOCIATE
PROFESSOR, CHANDIGARH
UNIVERSITY, MOHALI

SESSION 4

DAY-2
AUGUST 2 2023
1:00 PM-2:30 PM

MACHINE LEARNING AND ITS IMPACT ON
REAL-TIME APPLICATIONS

DR. NEHA SHARMA,
ASSISTANT PROFESSOR,
MANIPAL UNIVERSITY, JAIPUR

SESSION 5

DAY-3
AUGUST 3 2023
9:30 AM-11:00 AM

MACHINE LEARNING FOR SPATIAL DATA
ANALYSIS

DR. RUPALI KHARE,
ASSISTANT PROFESSOR,
GALGOTIAS COLLEGE,
GREATER NOIDA

SESSION 6

DAY-3
AUGUST 3 2023
1:00 AM-2:30 AM

EXPLORATORY DATA ANALYSIS

MS. SONAL SHARMA,
ASSISTANT PROFESSOR,
GALGOTIAS COLLEGE,
GREATER NOIDA

SESSION 7

DAY-4
AUGUST 4 2023
9:30 AM-11:00 AM

IMPLEMENTATION OF SMART CONTRACT
USING SOLIDITY

DR. NEELESH KUMAR JAIN,
ASSISTANT PROFESSOR,
JAYPEE UNIVERSITY OF
ENGINEERING &
TECHNOLOGY, GUNA

SESSION 8

DAY-4
AUGUST 4 2023
1:00 PM-2:30 PM

BLOCKCHAIN IN DIGITAL FORENSICS

DR. NILESH KUMAR PATEL,
ASSISTANT PROFESSOR,
JAYPEE UNIVERSITY OF
ENGINEERING &
TECHNOLOGY, GUNA

SESSION 9

DAY-5
AUGUST 5 2023
9:30 AM-11:00 AM

EMERGING TRENDS IN AI AND DATA
SCIENCE APPLICATIONS

DR. ANSHITA DHOOT,
RESEARCH SCHOLAR,
MOSCOW INSTITUTE OF
PHYSICS AND TECHNOLOGY,
MOSCOW

SESSION 10

DAY-5
AUGUST 5 2023
1:00 PM-2:30 PM

HOW TO WRITE A RESEARCH PAPER,
BOOK CHAPTER AND A CREATIVE IDEA
FOR A FILING PATENT

RAMAN CHADHA, PROFESSOR,
CHANDIGARH UNIVERSITY,
MOHALI

A Report on 5-days International Faculty Development Program

♦ **TITLE AND DURATION:** 5 - days International Faculty Development Program on “A Comprehensive Exploration of Cognitronics by Unraveling Technologies”, February 06-10, 2024.

♦ **SPONSORS:** Poornima College of Engineering

♦ **SUPPORTERS:** Poornima College of Engineering

♦ **ORGANIZERS:** Department of Computer Engineering and Department of Advance Computing, Poornima College of Engineering, Jaipur.

♦ **Coordinators:** Dr. Abhishek Sharma, Associate Professor
Ms. Neetu Joshi, Assistant Professor

♦ **OBJECTIVES:**

This Five Days Online Training Program's main objective was to provide sound domain knowledge, skill and training to faculty members / Industry persons / Research scholars on A Comprehensive Exploration of Cognitronics by Unraveling Technologies with industry connect.

♦ **EXPECTED OUTCOMES:**

- SAP introduction & how it enables the Intelligent Enterprise.
- Gain Knowledge of Recent Trends in Artificial Intelligence, Machine Learning and its Applications.
- Learn about Digital Image Processing using Soft Computing Techniques and Digital Image Forensic.
- Understand today's Internet of Everything, Sprint Planning and Agile Methodologies.
- Learn about the Emergence of AI and Data Analytics in Different Sectors and Development in Predictive Analysis.
- Understanding Beyond CMOS Devices for Neuromorphic Computing.

ABOUT POORNIMA COLLEGE OF ENGINEERING

Poornima College of Engineering, the pioneer institute of Poornima Group was established in 2000 with the aim of imparting pragmatic technical education. In its magnificent journey of 23 years, PCE has set benchmarks and reached new pinnacles in engineering education with dedication, perseverance, and devotion with student strength of approx. 2,500 studying ten specializations of engineering (CSE, CSE (AI), AI & DS, CSE (Cyber Security, CSE (Regional Language), ECE, EE, ME, Civil & IT). With more than 3.5 Lakh square feet of built-up area, highly qualified faculties, state-of-the-art infrastructure, good placements, and an industry-led curriculum, PCE is marching ahead of others with tremendous growth since its inception. PCE is spearheading its outstanding voyage with the motto 'Success is not a destination, it's a journey'. Poornima College of Engineering, Jaipur has been ranked 2nd under the QIV Ranking of Rajasthan Technical University, Kota since 2017. Recently Poornima College of Engineering has got accredited by The National Assessment and Accreditation Council (NAAC) with A+ Grade for 5-years.

ABOUT DEPARTMENT OF COMPUTER ENGINEERING

The Department of Computer Engineering, PCE was established in July 2000. It administers bachelor's programs in Computer Engineering, Artificial Intelligence, Cyber Security and AI & Data Science. The department is accredited by National Board of Accreditation (NBA) for quality and outcome-based education. The department strengths include its high faculty-to-student ratio, state of the art facilities, renowned faculty, and strong focus on undergraduate education balanced with leading-edge research, and emphasis on leadership, service and ethics. The Department aims at imparting quality education and strives to quench the thirst for knowledge. International conferences, Symposia, workshops, and seminar of national and international levels are organized by department in close liaison with renowned professional societies such as TEQIP, IEEE, CSI, IEI, ISTE, and ACM-W etc. Moreover experts with hands on experience regularly share their domain knowledge with the department. Most of the students passed out are well placed or have opted for higher studies.

ABOUT THE ADVANCE COMPUTING DEPARTMENT

The Department of Advance Computing offers B.Tech degree in three programs. These programs are Computer Sc. & Engineering (Artificial Intelligence), Artificial Intelligence (AI) & Data Science, and Computer Sc. & Engineering (Cyber Security). The faculty is determined and dedicated to ensure that their potential is utilized in preparing globally competent Engineers. To achieve this various curricular and co-curricular activities like expert lectures, workshops, conferences and FDPs are organized in the department. The department is well equipped with state of art laboratories and ICT enabled lecture rooms. To prepare industry ready students various activities like Campus Recruitment Training (CRT), Industry Institute Interaction (I3) Day and Non Syllabus Projects (NSP) are conducted in the department.

ABOUT FACULTY DEVELOPMENT PROGRAM (FDP)

In the ever-evolving landscape of technology, the intersection of cognitive science and electronics has given rise to a fascinating field known as Cognitronics. This emerging discipline explores the integration of cognitive processes with electronic systems, aiming to create advanced technologies that can mimic and augment human cognitive functions. Cognitronics represents the convergence of cognitive processes and electronic systems, revolutionizing the technological landscape. Discover the transformative power of this emerging field and its implications across diverse industries.

This FDP aims to equip participants with a comprehensive understanding of Cognitronics, from its foundational principles to hands-on experience with relevant technologies. By unraveling the intricate connection between cognitive processes and electronics, participants will gain valuable insights into the potential of Cognitronics to shape the future of technology and innovation.

ELIGIBILITY CRITERIA

This course is open to all the Faculty Members of AICTE Approved Institutions, Research Scholars and Persons working in R&D organizations or Industry. Number of participants for FDP is limited. All the sessions will be conducted Hybrid Mode (Online/Offline).

Training Program on “Emerging Trends in AI and Data Science Applications” from December 12th, 2022 to 16th December 2022.

The main objective of this Five Days Online Training Program was to provide sound domain knowledge, skill and training to faculty members / Industry persons / Research scholars on recent trends and applications of AI and Data Science based on real life with industry connect.

Mr. Ajay Sharma, Director Oil, Gas and Energy IBU, SAP, Dubai, UAE covered SAP introduction & how it enables the Intelligent Enterprise. Dr. Praveen Gupta, Associate Professor, GITAM, Visakhapatnam, Andhra Pradesh, covered Recent Trends in Artificial Intelligence and its Applications. Dr. Nitesh Pradhan, Associate Professor, Manipal University Jaipur, Rajasthan covered Digital Image Processing using Soft Computing Techniques. Ms. Anita Sharma, Assistant Professor, Manipal University Jaipur, Rajasthan took a session on Recent trends in Machine Learning. Dr. Neelesh Kumar Jain, Assistant Professor, Jaypee University of Engineering and Technology, Guna, M. P. took a session. which title was Digital Image Forensic. Dr. Gopal Krishan, Associate Professor, IIMT College of Engineering, Greater Noida deliver a session on Today's Internet of Everything. Mr. Shubham Gupta, Team Lead Software Engineer, Nagerro Enterprise, Gurugram covered Sprint Planning and Agile Methodologies. Dr. Anshita Dhoot, Moscow Institute of Physics and Technology, Moscow, Russia, covered Development in Predictive Analysis. Dr. Kiran Deep Singh, Associate Professor, Chitkara University, Punjab covered The Emergence of AI and Data Analytics in Different Sectors. Dr. Abhishek Acharya, Assistant Professor, Sardar Vallabhbhai National Institute of Technology, Surat, Raj. covered Beyond CMOS Devices for Neuromorphic Computing.

Salient features of the Training Program were:

- SAP introduction & it enables the Intelligent Enterprise.
- Recent Trends in Artificial Intelligence, Machine Learning and its Applications, and Development in Predictive Analysis using Python.
- Digital Image Processing using Soft Computing Techniques and Digital Image Forensics.
- Today's Internet of Everything, Sprint Planning and Agile Methodologies.
- Beyond CMOS Devices for Neuromorphic Computing.

The AND problem and its Neural network

A possible neuron specification to solve the AND problem is given in the following. In this solution, when the input is 11, the weight sum exceeds the threshold (= 0.9) leading to the output 1 else it gives the output 0.

Inputs		Output (y)
x_1	x_2	
0	0	0
0	1	0
1	0	0
1	1	1

The AND Logic

A single neuron

Here

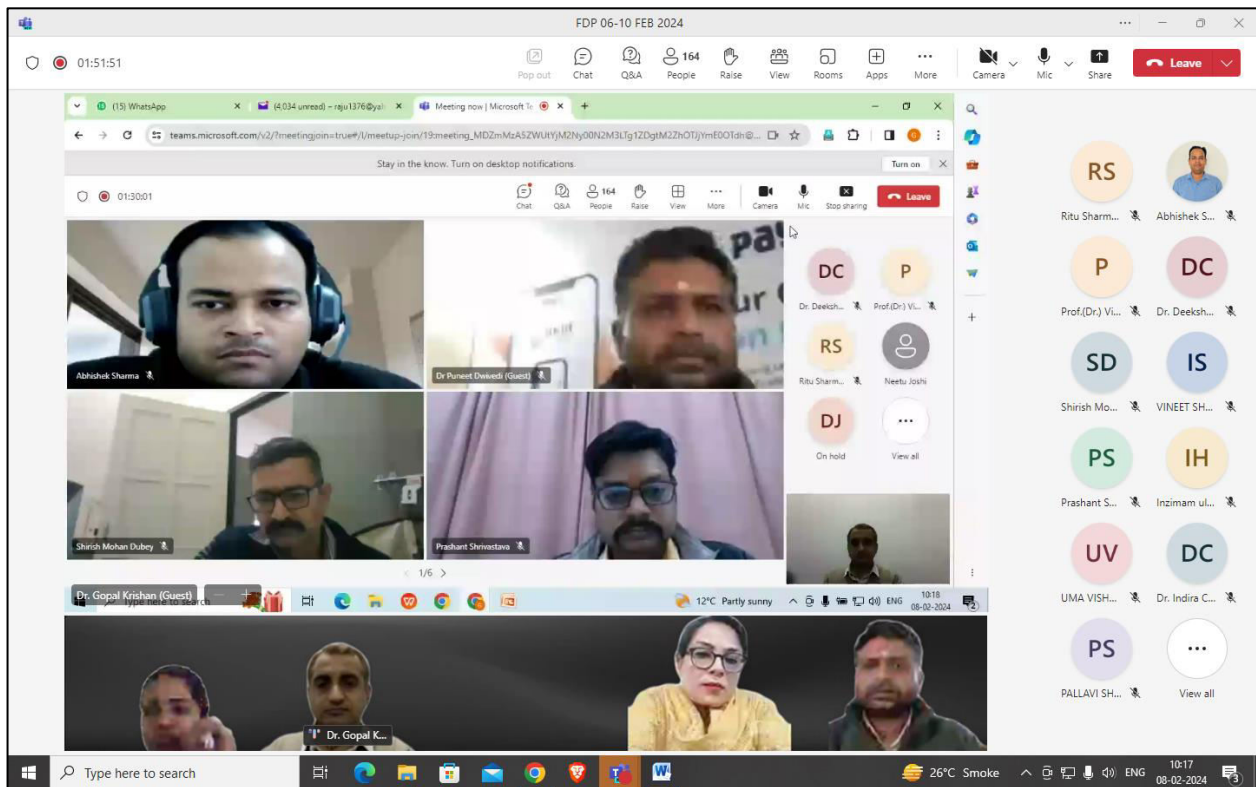

$$y = \sum w_i x_i - \theta$$

$w_1 = 0.5$
 $w_2 = 0.5$
 $\theta = 0.9$

A Report on 5-days International Faculty Development Program

♦ **TITLE AND DURATION:** 5 - days International Faculty Development Program on “A Comprehensive Exploration of Cognitronics by unravelling Technologies”, February 06-10, 2024.

♦ **SPONSORS:** Poornima College of Engineering

♦ **SUPPORTERS:** Poornima College of Engineering

♦ **ORGANIZERS:** Department of Computer Engineering and Department of Advance Computing, Poornima College of Engineering, Jaipur.

♦ **Coordinators:** Dr. Abhishek Sharma, Associate Professor

Ms. Neetu Joshi, Assistant Professor

♦ **OBJECTIVES:**

This Five Days Online Training Program's main objective was to provide sound domain knowledge, skill and training to faculty members / Industry persons / Research scholars on A Comprehensive Exploration of Cognitronics by Unravelling Technologies with industry connect.

♦ **EXPECTED OUTCOMES:**

- SAP introduction & how it enables the Intelligent Enterprise.
- Gain Knowledge of Recent Trends in Artificial Intelligence, Machine Learning and its Applications.
- Learn about Digital Image Processing using Soft Computing Techniques and Digital Image Forensic.
- Understand today's Internet of Everything, Sprint Planning and Agile Methodologies.
- Learn about the Emergence of AI and Data Analytics in Different Sectors and Development in Predictive Analysis.
- Understanding Beyond CMOS Devices for Neuromorphic Computing.

ABOUT POORNIMA COLLEGE OF ENGINEERING

Poornima College of Engineering, the pioneer institute of Poornima Group was established in 2000 with the aim of imparting pragmatic technical education. In its magnificent journey of 23 years, PCE has set benchmarks and reached new pinnacles in engineering education with dedication, perseverance, and devotion with student strength of approx. 2,500 studying ten specializations of engineering (CSE, CSE (AI), AI & DS, CSE (Cyber Security), CSE (Regional Language), ECE, EE, ME, Civil & IT). With more than 3.5 Lakh square feet of built-up area, highly qualified faculties, state-of-the-art infrastructure, good placements, and an industry-led curriculum, PCE is marching ahead of others with tremendous growth since its inception. PCE is spearheading its outstanding voyage with the motto 'Success is not a destination, it's a journey'. Poornima College of Engineering, Jaipur has been ranked 2nd under the QIV Ranking of Rajasthan Technical University, Kota since 2017. Recently Poornima College of Engineering has got accredited by The National Assessment and Accreditation Council (NAAC) with A+ Grade for 5-years.

ABOUT DEPARTMENT OF COMPUTER ENGINEERING

The Department of Computer Engineering, PCE was established in July 2000. It administers bachelor's programs in Computer Engineering, Artificial Intelligence, Cyber Security and AI & Data Science. The department is accredited by National Board of Accreditation (NBA) for quality and outcome-based education. The department strengths include its high faculty-to-student ratio, state of the art facilities, renowned faculty, and strong focus on undergraduate education balanced with leading-edge research, and emphasis on leadership, service and ethics. The Department aims at imparting quality education and strives to quench the thirst for knowledge. International conferences, Symposiums, workshops, and seminar of national and international levels are organized by department in close liaison with renowned professional societies such as TEQIP, IEEE, CSI, IET, ISTE, and ACM-W etc. Moreover experts with hands on experience regularly share their domain knowledge with the department. Most of the students passed out are well placed or have opted for higher studies.

ABOUT THE ADVANCE COMPUTING DEPARTMENT

The Department of Advance Computing offers B.Tech degree in three programs. These programs are Computer Sc. & Engineering (Artificial Intelligence), Artificial Intelligence (AI) & Data Science, and Computer Sc. & Engineering (Cyber Security). The faculty is determined and dedicated to ensure that their potential is utilized in preparing globally competent Engineers. To achieve this various curricular and co-curricular activities like expert lectures, workshops, conferences and FDPs are organized in the department. The department is well equipped with state of art laboratories and ICT enabled lecture rooms. To prepare industry ready students various activities like Campus Recruitment Training (CRT), Industry Institute Interaction (I3) Day and Non Syllabus Projects (NSP) are conducted in the department.

ABOUT FACULTY DEVELOPMENT PROGRAM (FDP)

In the ever-evolving landscape of technology, the intersection of cognitive science and electronics has given rise to a fascinating field known as Cognitronics. This emerging discipline explores the integration of cognitive processes with electronic systems, aiming to create advanced technologies that can mimic and augment human cognitive functions.

Cognitronics represents the convergence of cognitive processes and electronic systems, revolutionizing the technological landscape. Discover the transformative power of this emerging field and its implications across diverse industries.

This FDP aims to equip participants with a comprehensive understanding of Cognitronics, from its foundational principles to hands-on experience with relevant technologies. By unraveling the intricate connection between cognitive processes and electronics, participants will gain valuable insights into the potential of Cognitronics to shape the future of technology and innovation.

Training Program on “Emerging Trends in AI and Data Science Applications” from December 12th, 2022 to 16th December 2022.

The main objective of this Five Days Online Training Program was to provide sound domain knowledge, skill and training to faculty members / Industry persons / Research scholars on recent trends and applications of AI and Data Science based on real life with industry connect.

Mr. Ajay Sharma, Director Oil, Gas and Energy IBU, SAP, Dubai, UAE covered SAP introduction & how it enables the Intelligent Enterprise. Dr. Praveen Gupta, Associate Professor, GITAM, Visakhapatnam, Andhra Pradesh, covered Recent Trends in Artificial Intelligence and its Applications. Dr. Nitesh Pradhan, Associate Professor, Manipal University Jaipur, Rajasthan covered Digital Image Processing using Soft Computing Techniques. Ms. Anita Sharma, Assistant Professor, Manipal University Jaipur, Rajasthan took a session on Recent trends in Machine Learning. Dr. Neelesh Kumar Jain, Assistant Professor, Jaypee University of Engineering and Technology, Guna, M. P. took a session. which title was Digital Image Forensic. Dr. Gopal Krishan, Associate Professor, IIMT College of Engineering, Greater Noida deliver a session on Today's Internet of Everything. Mr. Shubham Gupta, Team Lead Software Engineer, Nagerro Enterprise, Gurugram covered Sprint Planning and Agile Methodologies. Dr. Anshita Dhoot, Moscow Institute of Physics and Technology, Moscow, Russia, covered Development in Predictive Analysis. Dr. Kiran Deep Singh, Associate Professor, Chitkara University, Punjab covered The Emergence of AI and Data Analytics in Different Sectors. Dr. Abhishek Acharya, Assistant Professor, Sardar Vallabhbhai National Institute of Technology, Surat, Raj. covered Beyond CMOS Devices for Neuromorphic Computing.

Salient features of the Training Program were:

- SAP introduction & it enables the Intelligent Enterprise.
- Recent Trends in Artificial Intelligence, Machine Learning and its Applications, and Development in Predictive Analysis using Python.
- Digital Image Processing using Soft Computing Techniques and Digital Image Forensics.
- Today's Internet of Everything, Sprint Planning and Agile Methodologies.
- Beyond CMOS Devices for Neuromorphic Computing.

Day 1 Session 1

The screenshot displays a Microsoft Teams meeting interface. The main window shows a presentation slide titled "Introduction to SAP ERP & How it enables the Intelligent Enterprise" by Ajay Sharma, dated December 2022. The slide features the SAP logo and the text "Industries and Customer Advisory". Below the slide, the meeting controls bar shows participants: Pankaj Dhemla (Guest), Nikita Jain, and Dr. Kamlesh Gautam. The bottom of the screen shows a Windows taskbar with various application icons and a search bar.

Below the Teams window, a presentation slide titled "Automotive Industry Example" is visible. It features a process flow diagram with six stages: Research, Development, and Engineering; Manufacturing and Outbound Logistics; Responsive Supply Networks; Sales and Marketing; Aftermarket Services; and Smart Mobility and Transformation. The diagram includes icons for various automotive components and services.

The screenshot displays a Zoom meeting window. The top toolbar includes icons for Pop out, Chat, Q&A, People (100), Raise, React, View, Rooms, Apps, More, Camera, Mic, Share, and a red 'Leave' button. The main content area shows a presentation slide titled 'Importance of Research' with the following text:

Supporting Decision-Making: In applied research, data analysis assists decision-makers in various sectors, such as business, government, and healthcare, Policy decisions, marketing strategies

Identifying Outliers and Anomalies: Outliers and anomalies in data can hold valuable information or indicate errors. Data analysis techniques can help identify these exceptional cases

Revealing Insights: Research data often contain hidden insights that are not immediately apparent. Data analysis techniques, such as clustering or text analysis, can uncover these insights.

Forecasting and Prediction: Data analysis allows for the development of predictive models. Researchers can use historical data to build models forecasting future trends or outcomes. This is valuable in fields like finance for stock price predictions

A notification box states: 'Showing conversation Recording has started. Started by Abhishek Sharma. By attending this meeting, you consent to being recorded. Privacy policy'.

The right sidebar shows a list of participants: Dr. Jitendra Singh Kushwah, ITM Gwalior (Guest), DM (Dr. Shivani Middha (Guest)), TK (Tanu Kumari (Guest)), Abhishek Sharma, and NJ (Neetu Joshi). Below the list is a 'Participants' panel with a search bar, 'Share invite' button, and a list of 195 participants in the meeting, including Dr. Subhash Chandra, Neetu Joshi, A. Kumar, Abha Jain, Abhishek Dadh..., Abhishek Sharma, ANAND KUMAR, Anand Kumar Pandey, Anjali Pandey, Antim, Anuj Kumar, and Archana Tomar.

The bottom of the screen shows the Windows taskbar with the search bar, taskbar icons, and system tray showing 26°C, Smoke, and the date 07-02-2024.

Day 2 Session 2

Poornima College of Engineering - Activity Report – 2023-24

The screenshot displays a Zoom meeting in progress. The main window shows a presentation slide titled "Change Detection in Satellite Imaging and Its Applications" by Dr. Sourabh Singh Verma, Associate Professor at Manipal University Jaipur. The slide is part of a five-day FDP program. The Zoom interface includes a top bar with the date "FDP 06-10 FEB 2024" and a bottom bar with the time "04:41:21". The right sidebar shows a list of participants, including Neetu Joshi, DR RATNESH K..., and others. The bottom status bar indicates the system temperature as "26°C Smoke" and the date as "07-02-2024".

The AND problem and its Neural network

A possible neuron specification to solve the AND problem is given in the following. In this solution, when the input is 11, the weight sum exceeds the threshold (= 0.9) leading to the output 1 else it gives the output 0.

Inputs	Output (y)
x_1 x_2	
0 0	0
0 1	0
1 0	0
1 1	1

The AND Logic

A single neuron

Here

$$y = \sum w_i x_i - \theta$$

$w_1 = 0.5$
 $w_2 = 0.5$
 $\theta = 0.9$

Report on Training Program for Technical Assistants

NAME OF ACTIVITY: Training Program for Technical Assistants

DATE & DURATION: 12th -16th February, 2024

ORGANIZED BY: Department of Civil Engineering

EXPECTED OUTCOMES:

Technical Assistants will develop proficiency in using tools, techniques, and equipment relevant to their domain.

Technical Assistants will understand and apply workplace safety protocols and compliance with standards.

Technical Assistants will enhance problem-solving and troubleshooting skills for practical challenges in their work.

INTRODUCTION:

A technical assistant in civil engineering laboratories plays an essential role in ensuring the smooth operation of experiments and tests. They assist in setting up equipment, conducting tests, and recording data accurately. Their responsibilities may include calibrating instruments, maintaining inventory, and ensuring safety protocols are followed. They provide valuable support to engineers and researchers by preparing samples, analyzing results, and troubleshooting technical issues. Their attention to detail and proficiency with laboratory procedures contribute significantly to the efficiency and reliability of experiments, ultimately aiding in the advancement of civil engineering knowledge and practices.

OBJECTIVES:

The primary objectives of the training program are to improve the technical skills as well as safety precautions during practical session. Poornima College of Engineering management has always realized and emphasized that the start of any session or semester should be done after formal orientation and training towards their roles, responsibilities and performance indicators. Such training is focused on improvement of individual's caliber and capabilities.

During this session following objectives are discussed:

1. Enhance the knowledge and skills of technical assistants in the Material Testing Lab.
2. Improve interpersonal bonding between faculty members and technical assistants.
3. Foster better coordination during experiment performance throughout the semester.
4. Familiarize technical assistants with their roles, responsibilities, and performance indicators.
5. Emphasize safety precautions during lab activities.
6. Preparation of Lab Experiments and Execution
7. Stock Register Preparation and Checking
8. Lab Maintenance and Cleaning
9. Lab Display (Charts, Experiment List, Rotor Plan, Safety Rules, Students List along with marks etc.)
10. Evaluation of Student's Work
11. Self Help Group and Student Driven Activities

Dear Folks,

Poornima College of Engineering management has always realized and emphasized that the start of any session or semester should be done after formal orientation and training towards their roles, responsibilities and performance indicators. Such training is focused on improvement of individuals' caliber and capabilities.

The training is scheduled for the session 2023-24 from February 12th to February 16th 2024.

So all the technical assistant and faculty members, please manage your presence in the campus according to the above mentioned dates.

ROLES AND RESPONSIBILITIES

Faculty Member (Coordinator):

- ❖ He will oversee the training program.
- ❖ Conduct experiments and explain procedures to technical assistants.
- ❖ Ensure adherence to safety protocols.

Technical Assistants:

- ❖ Assist faculty members during experiments.
- ❖ Perform tasks as instructed.
- ❖ Follow safety guidelines rigorously.

TRAINING SCHEDULE:

There are five performing labs in the curriculum of the even semester, which include students from the IV, VI, and VIII semesters in the department. Training for technical assistant

associated with these laboratories are scheduled as the time table above. The activities carried out in these laboratories are mentioned below –

a) Concrete Technology Lab –

The Coordinator of Concrete Technology Lab training is **Mr. Narendra Bhadana**. During this session followings experiments are discussed –

- To determine the fineness of Cement by Blaine's air permeability test.
- To determine the flexural strength of Concrete.
- To determine Soundness of cement by Le-chatelier apparatus.
- To determine the specific gravity of fine aggregate (sand) by Pycnometer.
- To determine the bulking of fine aggregate and to draw curve between water content and bulking.
- Sieve analysis of coarse aggregates and fine aggregates.
- To determine the workability of given concrete mix by slump test.
- To determine the optimum dose of super plastisizers by Flow table test.
- To design concrete mix of M-20 grade in accordance with I S 10262.
- To design concrete mix of M-40 grade with super plasticizer in accordance with IS-10262.
- To determine the Permeability of Concrete.
- Study of Core cutter, UPV & Rebound Hammer equipment.
- To determine the compressive strength of concrete cube.
- To determine the compressive strength of cement-mortar cube.

There were two sessions in concrete lab. In session one, experiments related to raw material like specific gravity and sieve analysis of aggregates, and Blaine's air permeability test, Soundness of cement by Le-chatelier apparatus of cement were performed.

In session two, the mix designing of concrete was performed and fresh properties of concrete was evaluated. Later, concrete molds were casted for compressive strength, flexural strength and permeability of prepared concrete.

b) Hydraulic Machine Lab –

The Coordinator of Hydraulic Machine Lab training is **Mr. Rituraj Singh Rathore**. During this session followings experiments are discussed –

- To determine the discharge of venturimeter
- To determine the friction factor
- To determine the minor losses
- To study velocity distribution in open channel
- To determine Cd of broad crested weir
- To verify the momentum equation
- To determine manning's and chezy's coefficient of roughness for the bed of a given channel
- To study and plot characteristics curve of hydraulic jump

Two sessions of hydraulic machine lab were scheduled to provide training. In session one, experiments of determine the discharge of venturimeter, friction factor and minor losses were explained. In session two, velocity distribution in open channel, Cd of broad crested weir, manning's and chezy's coefficient of roughness for the bed of a given channel were studies.

c) **Material Testing Lab –**

The Coordinator of Material Testing Lab training is **Mr. Ayush Meena**. During this session followings experiments are discussed –

Experiments on Mild Steel and HYSD Bar:

- Determination of compressive and tensile strength.
- Calculation of yield strength and percentage elongation.

Experiments on Cement and Concrete Cubes/Core:

- Estimation of strength.

Experiments on Hardness:

- Rockwell and Brinell hardness tests.

Experiments on Impact and Modulus of Rupture:

- Izod and Charpy impact tests.
- Determination of modulus of rupture for wooden beams.

Additional Experiments:

- Fatigue test.
- Spring test.
- Torsion test.

In session one, experiments on mild steel and HYSD bars were carried out. In session two hardness, modulus of rupture, fatigue and torsion test were explained.

d) Advance Surveying Lab –

The Coordinator of Advance Surveying Lab training is **Mr. Prateek Sharma**. During this session followings experiments are discussed –

- To measure the horizontal and vertical angles by Theodolite.
- To determine the Height of an object by trigonometric leveling (Instruments in same vertical plane).
- To determine the Height of an object by trigonometric leveling (Instruments in different vertical planes).
- Measurement of angles, length of survey line using Total Station, finding the coordinate of station
- To measure and adjust the angles of a braced quadrilateral.
- To prepare the map of given area by plane tabling.
- Measurement of area of a traverse by Total Station

List of experiments performed during this session (Add on Experiments):

1. Measurement of the Area using Planimeter (Session 1)
2. Find Gradients by Ceylon Ghat Tracer (Session 2)

Session 1

Planimeter

A Planimeter is a table-top instrument for measuring areas, usually the areas of irregular regions on a map or photograph. Planimeter is an instrument used in surveying to compute the area of any given plan. Planimeter only needs plan drawn on the sheet to calculate area. Generally, it is very difficult to determine the area of irregular plot. So, by using Planimeter we can easily calculate the area of any shape.

Following are the parts of a Planimeter:

Tracing arm	Vernier	Tangent screw	Dial
Tracing point	Clamp	Index	Weight and needle point
Anchor arm	Hinge	Wheel	

Session 2

CEYLON GHAT TRACER

It is a very useful instrument for setting out gradients. It essentially consists of a long circular tube having a peep hole at one end and cross wires on the other ends. The tube is supported by a A- frame having a hole at its top to fix the instrument to a straight rod or stand. The tube is also engraved to give readings of gradients. A heavy weight slides along the tube by a suitable rack and pinion arrangement. The weight at its top contains one beveled edge which slides along the graduations of the bar, and serves as an index. The line of sight is defined by the line joining the hole to the intersection of the cross wires and its prolongation. For elevated gradients, the weight is slided towards the observer.

e) **Environmental Engineering and Design Lab –**

The Coordinator of Environmental Engineering and Design Lab training is **Dr. Santanu Mallik**. During this session followings experiments are discussed –

- Physical Characterization of water: Turbidity, Electrical Conductivity, pH
- Analysis of solids content of water: Dissolved, Settleable, suspended, total, volatile, inorganic etc.
- Alkalinity and acidity, Hardness: total hardness, calcium and magnesium hardness
- Optimum coagulant dose
- Chemical Oxygen Demand (COD)
- Dissolved Oxygen (D.O) and Biochemical Oxygen Demand (BOD)
- Break point Chlorination
- Bacteriological quality measurement: MPN,

The physical characteristics of water were explained and test were performed in session one. In session two, importance of COD, DO and BOD were explained and then experimental procedure was demonstrated.

CONCLUSION:

The training program organized by the Department of Civil Engineering at Poornima College of Engineering provides a valuable opportunity for technical assistants to enhance their skills and knowledge in the laboratories. By emphasizing safety, coordination, and effective communication between faculty members and technical assistants, the program aims to improve the overall efficiency and effectiveness of lab activities throughout the semester. We anticipate that this training will contribute to the professional development of technical assistants and facilitate the smoother operation of the laboratories.

OBJECTIVE:

The objective of this Faculty Development Program is to equip participants with cutting-edge knowledge and skills in the field of construction engineering and structural design. Through interactive sessions, and case studies, the program aims to explore emerging trends, innovative technologies, and sustainable practices shaping the construction industry. Participants will gain insights into advanced methodologies, materials, and tools essential for designing resilient structures and addressing contemporary challenges. Ultimately, the FDP seeks to empower educators and professionals to integrate state-of-the-art practices into their teaching, research, and professional endeavors, fostering excellence and innovation in construction engineering and structural design.

ABOUT THE FDP:

The FDP (Faculty Development Program) on "Constructing Tomorrow: Advancements in Construction Engineering & Structural Design" aims to delve into the forefront of construction engineering and structural design. Through a comprehensive curriculum, it seeks to familiarize participants with the latest technologies, methodologies, and sustainable approaches shaping the construction industry. The program emphasizes hands-on learning, workshops, and interactive sessions to facilitate deep understanding and practical application. Participants will explore emerging trends, innovative materials, and best practices essential for designing resilient structures. Ultimately, the FDP endeavors to empower educators and professionals with the knowledge and skills needed to drive innovation and excellence in construction engineering and structural design practices.

ABOUT POORNIMA COLLEGE OF ENGINEERING

Poornima College of Engineering, the pioneer institute of Poornima Group was established in 2000 with the aim of imparting pragmatic technical education. In its magnificent journey of 23 years, PCE has set benchmarks and reached new pinnacles in engineering education with dedication, perseverance, and devotion with student strength of approx. 2,500 studying ten specializations of engineering (CSE, CSE (AI), AI & DS, CSE (Cyber Security), CSE (Regional Language), ECE, EE, ME, Civil & IT). With more than 3.5 Lakh square feet of built-up area, highly qualified faculties, state-of-the-art infrastructure, good placements, and an industry-led curriculum, PCE is marching ahead of others with tremendous growth since its inception. PCE is spearheading its outstanding voyage with the motto 'Success is not a destination, it's a journey'. Poornima College of Engineering, Jaipur has been ranked 2nd under the QIV Ranking of Rajasthan Technical University, Kota since 2017. Recently Poornima College of Engineering has got accredited by The National Assessment and Accreditation Council (NAAC) with A+ Grade for 5-years.

ABOUT DEPARTMENT OF CIVIL ENGINEERING

The Civil Engineering Department of PCE came into existence in the year 2011 with an alignment of the department's evolution with key events and technological advances for the betterment of the society and nation. At present, it has the intake of 60 students providing all the amenities of infrastructure related to knowledge, research, experiments and training of multiple professions. Poornima College of Engineering believes that Civil Engineering is an evergreen branch in the engineering profession. Therefore, the Department of Civil Engineering has renowned scholars as the faculty members for sharing the knowledge. It has been taking initiatives for the versatile enhancement of the students through the technical, cultural and sports fests since its inception.

ABOUT THE FDP

The FDP (Faculty Development Program) on "Constructing Tomorrow: Advancements in Construction Engineering & Structural Design" aims to delve into the forefront of construction engineering and structural design. Through a comprehensive curriculum, it seeks to familiarize participants with the latest technologies, methodologies, and sustainable approaches shaping the construction industry. The program emphasizes hands-on learning, workshops, and interactive sessions to facilitate deep understanding and practical application. Participants will explore emerging trends, innovative materials, and best practices essential for designing resilient structures. Ultimately, the FDP endeavors to empower educators and professionals with the knowledge and skills needed to drive innovation and excellence in construction engineering and structural design practices.

Themes -

1. Advances in Soil investigation in design construction
2. Innovative construction material for sustainability
3. Emerging technology in construction practices
4. Advancement in structural design methods
5. Latest software uses in Civil Engineering

OBJECTIVE OF FDP

The objective of this Faculty Development Program (FDP) is to equip participants with cutting-edge knowledge and skills in the field of construction engineering and structural design. Through Interactive sessions, and case studies, the program aims to explore emerging trends, innovative technologies, and sustainable practices shaping the construction industry. Participants will gain insights into advanced methodologies, materials, and tools essential for designing resilient structures and addressing contemporary challenges. Ultimately, the FDP seeks to empower educators and professionals to integrate state-of-the-art practices into their teaching, research, and professional endeavors, fostering excellence and innovation in construction engineering and structural design.

ELIGIBILITY CRITERIA

This FDP is open to all the faculty members of AICTE approved institutions, research scholars, and persons working in Industry, Entrepreneurship or R&D organizations. Number of participants for the workshop is limited. The participants who will attend all the sessions of this workshop (attendance record-80%) and submit feedback forms will be eligible for U-Certificates.

RESOURCE PERSON

The resource person for this FDP will be experts in the relevant area from IITs, NITs, Industry, Corporate other reputed institutions of India.

Dear All,

Greetings from the Department of Civil Engineering, Poornima College of Engineering Jaipur, Rajasthan.

We are delighted to inform you that the Department of Civil Engineering, PCE is organizing **A Five-Days FDP on "Constructing Tomorrow: Advancements in Construction Engineering & Structural design" on March 8-9 & 11-13, 2024.**

Objectives of the FDP are:

1. The objective of this Faculty Development Program is to equip participants with cutting-edge knowledge and skills in the field of construction engineering and structural design.
2. Through interactive sessions, and case studies, the program aims to explore emerging trends, innovative technologies, and sustainable practices shaping the construction industry.
3. Participants will gain insights into advanced methodologies, materials, and tools essential for designing resilient structures and addressing contemporary challenges.
4. Ultimately, the FDP seeks to empower educators and professionals to integrate state-of-the-art practices into their teaching, research, and professional endeavors, fostering excellence and innovation in construction engineering and structural design.

In view of the above, we cordially invite all the faculty members, research scholars, and industry persons to register for this workshop using the following link:

Registration Link: <https://forms.gle/kEVot4rRszyMcnCo9>

Session Link: <https://tinyurl.com/3x9s733k>

The Important details related to this FDP are as follows:

1. There is **No Registration Fee** for this FDP. The registration link will remain active till **March 7, 2024.**
2. Participants who complete the FDP with at least 80% attendance and attempt feedback will receive an e-certificate
3. Registered attendees will receive links to the invitation and expert information by **March 7, 2024**, through email.

For your reference, here is the FDP brochure. Please feel free to contact the FDP's organizing/Coordinating team for more information.

FDP Convener,

Dr. Vishal Singhal

Welcome to Session 1

Date: 08 March 2024 Time: 09:30-11:00

Topic: Structural design practices of pre engineering building (PEB) in steel

Date & Day: March 08th, 2024 & Friday.

Time: 9:30 AM to 11:00 AM

Resource Person: Mr. Rohit

(Founder and Director, TeXel Consulting Engineers (Pvt.) Ltd., Jaipur)

About the Session:

Mr. Rohit commenced the session on Staad.Pro & Structural Design Practices of Pre-Engineered Buildings (PEB) in Steel with an overview of the significance of PEBs in contemporary construction. He emphasized the increasing popularity of PEBs owing to their cost-effectiveness, speed of construction, and design flexibility. His main focus on Comprehensive understanding of PEB fundamentals and design principles. Insight into material selection criteria and structural considerations for PEBs. Familiarity with connection design methodologies and optimization techniques.

The session featured interactive discussions and Q&A segments, allowing participants to clarify doubts and delve deeper into specific aspects of PEB design. Mr. Rohit encouraged active participation, fostering a conducive learning environment.

Welcome to Session 2

Date: 08 March 2024 Time: 01:00-2:30 PM

Resource Person: Engammagari Ganesh

Engammagari Ganesh is a scholar pursuing a Ph.D. in NCDMM at MNIT. He completed his post-graduation from MNIT Jaipur and graduation from Pullareddy Engineering college, Kurnool. Apart from academic excellence, Ganesh has actively participated in extracurricular activities. He has received numerous accolades, including prizes for paper presentations, debates, and quizzes. Additionally, he has contributed to various social causes as an NSS volunteer. Ganesh's research contributions are evident through his publications in reputable journals and presentations at national and international conferences. His research interests primarily revolve around structural dynamics, seismic fragility, and mathematical modeling.

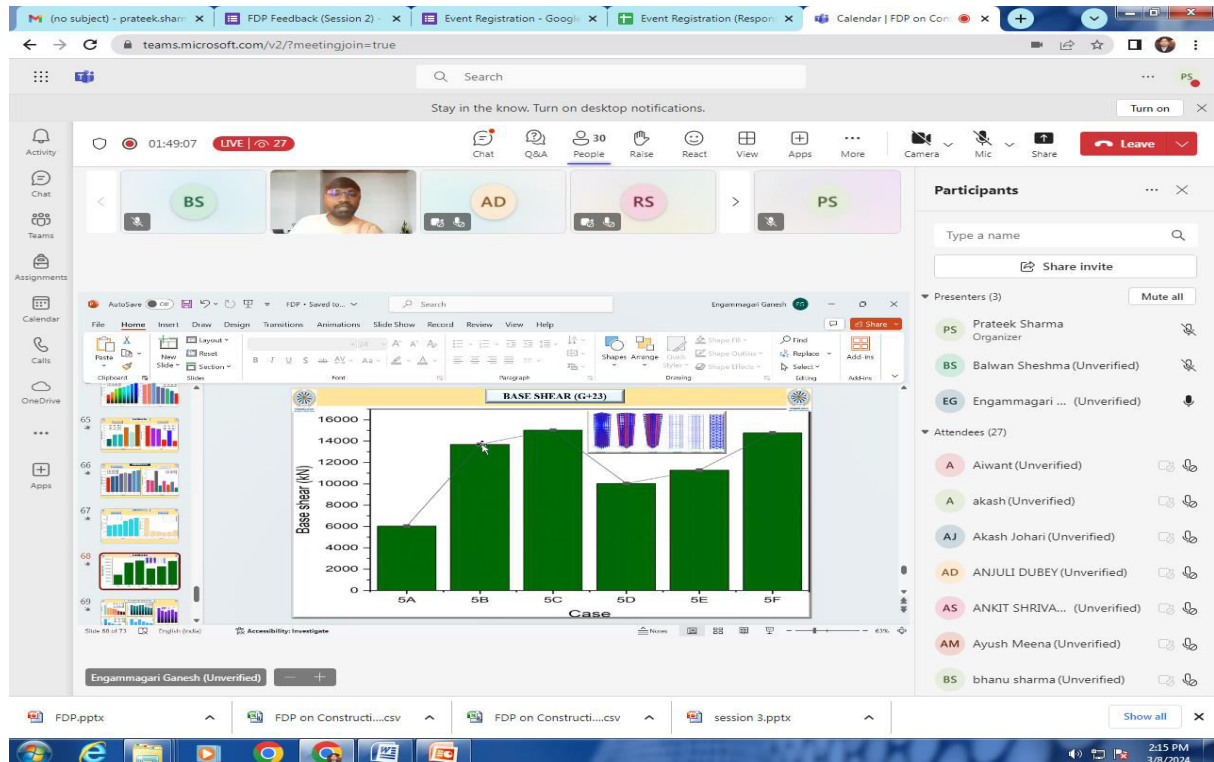

About the Session:

Mr. E. Ganesh led the second session on Estimation of Seismic Fragility in Structural Systems, delving into the critical aspect of assessing structural vulnerability to seismic events. He elucidated the significance of seismic fragility analysis in enhancing structural resilience and mitigating seismic risks. His main focus on, Seismic Fragility Analysis & Fundamentals of Seismic Engineering.

Mr. Ganesh provided an overview of seismic fragility analysis, explaining its role in quantifying the probability of structural damage or failure under seismic loading conditions.

The presenter elucidated fundamental concepts in seismic engineering, including ground motion characteristics, seismic hazard analysis, and the seismic design philosophy.

Participants engaged in interactive discussions and knowledge-sharing activities, exploring practical challenges and best practices in seismic fragility estimation. Mr. Ganesh encouraged active participation, fostering an enriching learning environment.

About the Session:

Mr. Sandesh Sharma led the third session, focusing on Bacterial Concrete and Ultra-High

Performance Concrete (UHPC), two innovative materials revolutionizing the construction industry. He explored the unique properties, benefits, and applications of these advanced concrete types.

Key Topics Covered:

Bacterial Concrete:

Mr. Sharma introduced bacterial concrete, highlighting its self-healing properties facilitated by embedded bacteria capable of producing calcium carbonate to repair cracks autonomously. He discussed the mechanisms, advantages, and challenges associated with bacterial concrete applications.

Ultra-High Performance Concrete (UHPC):

The presenter delved into the characteristics and composition of UHPC, emphasizing its exceptional strength, durability, and ductility. He elaborated on the constituent materials, mix design, and manufacturing processes that contribute to UHPC's superior performance.

The screenshot displays a Microsoft Teams meeting window. At the top, there's a status bar with the time 01:09:24, a 'LIVE' indicator with 37 participants, and various controls like Chat, Q&A, People, Raise, React, View, Apps, More, Camera, Mic, Share, and a 'Leave' button. Below this is a navigation bar with icons for Activity, Chat, Teams, Signments, Calendar, Calls, OneDrive, and Apps. The main content area shows a presentation slide titled 'Content' with a bulleted list of topics: Concrete and its properties, Innovation and sustainability, Innovation in field of concrete, and Bacterial Concrete (which includes sub-points: Need and application, Types of healings, Biomineralization, Mechanical, durability and micro-structural analysis of bacterial composite, and Recommendations and conclusions). The presentation is titled 'Bacterial Concrete' and is part of a 'Faculty Development Programme, Poomina College of Engineering'. The presenter is identified as 'SANDESH AKHILESH KUMAR SHARMA (Unverified)'. On the right side, there's a 'Participants' panel showing a search bar, a 'Share invite' button, and lists of 'Presenters (3)' and 'Attendees (41)'. The presenters listed are Prateek Sharma (Organizer), Balwan Sheshma (Unverified), and SANDESH AKH... (Unverified). The attendees list includes PHDSAMME-1... Mr. Sandesh Sharma's session on Bacterial Concrete and Ultra High Performance Concrete provided participants with a comprehensive overview of these cutting-edge materials and their transformative potential in construction. The session fostered a deeper understanding of the technical aspects, applications, and sustainability implications of bacterial concrete and UHPC.

Welcome to Session 4

Date: 09 March 2024 Time: 01:00-2:30 PM

About the Session:

Rakesh Choudhary is currently pursuing his Ph.D. in Civil Engineering from MNIT, Jaipur. He completed his M.Tech in earthquake engineering from MNIT, Jaipur. Prior to that, he obtained his B.Tech in Civil Engineering from Govt. Engineering College, Jhalawar.

Rakesh sir has gained valuable professional experience through various roles. He served as an Assistant Professor at Poornima University, Jaipur and at Vyas College of Engineering & Technology, Jodhpur. Prior to his academic career, he worked as a Consultant Engineer at M/s Shree Bhairavnath Enterprises, Jodhpur, and contributed to the construction of Rajasthan High court building with RSRTC Jodhpur.

Rakesh's research interests and publications demonstrate his commitment to advancing the field of civil engineering. He has authored papers on topics such as the partial replacement of fine aggregate with glass and treatment of wastewater in the dairy industry. His technical skills include proficiency in AutoCAD and MATLAB.

Dr. Shivraj has over 17 years of rich experience in industry and academia. He has been awarded DAAD Fellowship for research at 'Karlsruhe Institute of Technology (KIT), Germany'. ASHRAE awarded scholarships to Dr. Shivraj and presently he is RRL at ASHRAE Region- At-Large to advocate on 'Energy Efficiency and Net Zero. At Indian Green Building Council, Dr. Shivraj heads Green Building Certification of Commercial Establishments. Along with this, he leads Green and Net Zero cooperation projects. Building Simulation, Standards & Codes of Energy & IEQ are key interests of Dr. Shivraj. He served ASHRAE in several capacities and presently Dr. Shivraj is the President of ASHRAE Rajasthan Chapter. He is a member of several Technical Committees of ASHRAE. Research scholars regularly interact with Dr. Shivraj for mentorship on variety of topics.

About the Session:

Session No. 5 of Dr. Shivraj Dhaka's lecture series on Green Building provided a comprehensive overview of sustainable construction principles, benefits, and practices. Attendees gained valuable insights into the significance of green building in addressing environmental challenges while creating healthier and more efficient built environments. The session underscored the importance of integrating sustainability into every stage of the building lifecycle, from design and construction to operation and maintenance, to achieve lasting environmental and societal impact

What Green buildings did differently

- ❖ **New Technologies / Products**
 - Waterless urinals
 - Root Zone treatment systems
 - Light pipes
 - Wide-spread use of flyash blocks
 - Insulated walls, roof, glazing
 - Low emitting materials – Paints, Sealants, Adhesives
- ❖ **Resource reuse**
 - Reuse of used furniture
 - Eg., ITC Green Centre, Wipro, Turbo Energy
- ❖ **Use of specialised tools**
 - Simulation – Energy, Lighting

Mohammed Rihan has completed his PhD in Civil Engineering from MNIT Jaipur, Currently working as an Assistant Professor in the Civil Engineering Department at PG Moze College of Engineering Pune, affiliated with Savitri Bai Phule Pune University, he has 6 years of teaching experience and 4 years of research experience. Rihan has been recognized for his contributions with the Swacch Saarthi Fellowship from the Principal Scientific Advisor, Government of India, and has received a Gold Medal in M.Tech. He has published 10 SCIE/Scopus indexed research articles, holds one Indian patent, and his research interests include geopolymer concrete, construction and demolition waste recycling, sustainability assessment, design optimization, and product development using waste materials.

About the Session:

Session No. 6 of Mr. Rihan Maaze's lecture series provided valuable insights into the valorization of construction and demolition waste for sustainable concrete production. Attendees gained a deeper understanding of the potential of CDW as a valuable resource in the construction industry, contributing to resource efficiency, environmental sustainability, and circular economy principles. The session underscored the importance of ongoing research, innovation, and collaboration to further advance the adoption of sustainable practices in concrete production and waste management.

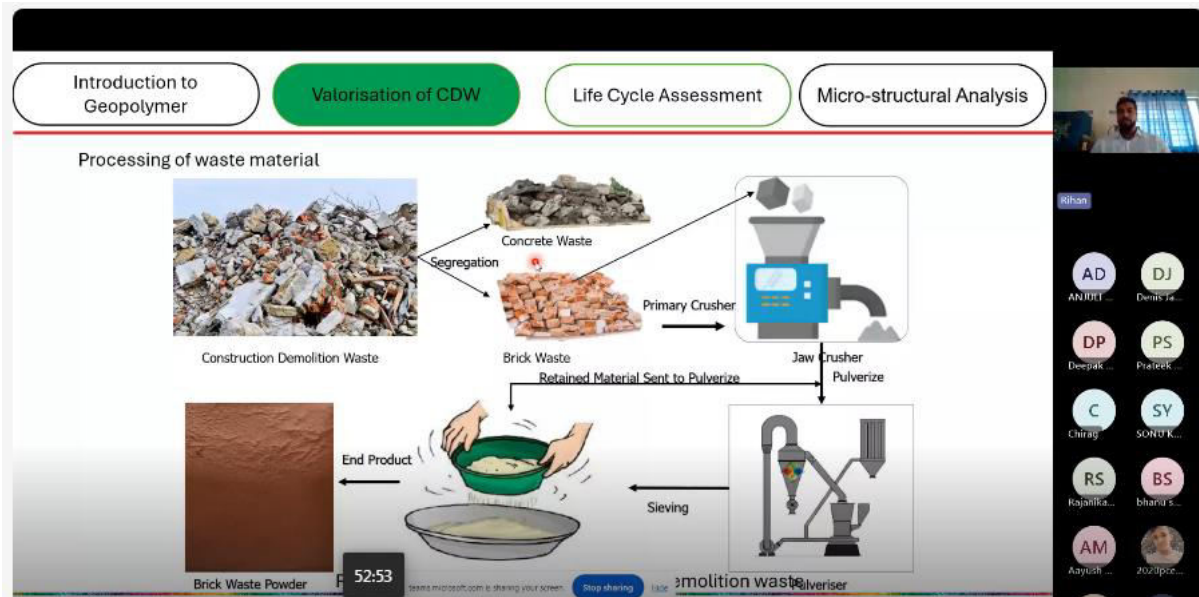

The screenshot shows a Zoom meeting interface. The main window displays a presentation slide with the following content:

- Logo:** Savitri Bai Phule Pune University
- Title:** A Presentation On
- Topic:** Valorization of Construction and Demolition Waste through alkali-activation for sustainable construction
- Subtitle:** FDP on Constructing Tomorrow: Advancements in Construction Engineering & Structural Design
- Speaker:** Mohammed Rihan Maaze, Assistant Professor, PG Moze College of Engineering, Savitri bai Phule Pune University, Pune

Welcome to Session 7

Date: 12 March 2024

Time: 09:30-11:00 AM

About the speaker –

Dr. Pooja Gupta is an accomplished professional with a passion for teaching and a strong commitment to her field. With over 18 years of experience in the civil engineering domain, Dr. Gupta has made significant contributions to the academic and research communities. She has completed PhD in Year 2018 from Rajasthan Technical University, and her area of research is Ground improvement and Geotechnical Engineering.

Dr. Mahesh Bunde

Currently serving as an Associate Professor at Swami Keshvanand Institute of Technology, Management & Gramothan in Jaipur, she previously held the position of Professor at Poornima College of Engineering, Jaipur. Dr. Gupta's expertise and knowledge have been recognized through her nomination in the Research Committee of the Department of Civil Engineering at Rajasthan Technical University, Kota.

About the Session:

Session No. 7 of Dr. Pooja Gupta's lecture series provided valuable insights into the advancements in soil investigation techniques and their implications for the construction industry. Attendees gained a deeper understanding of the importance of leveraging innovative technologies and methodologies to enhance the accuracy, efficiency, and reliability of soil characterization processes.

Site Investigation

An engineering programme used to assess the suitability of a site for a proposed construction work.

It is also necessary in reporting the safety & causes of failures of existing works.

The **sub surface conditions** can be evaluated by taking samples by boring or by digging exploratory pits. Field & laboratory studies carried out to obtain the knowledge of sub-soil conditions for a safe & economic design of substructures is called as **subsurface exploration**.

The choice and extent of exploration method depends upon the nature of the material, on the purpose of the exploration, importance of the structure, the complexity of the soil conditions and the budget available for exploration.

A detail soil exploration programme involves deep boring, field tests and laboratory tests for determination of different properties of soils required for the design of any structure.

Proper inspection and guidance in boring operations and investigations are essential to ensure that the required data are obtained.

Welcome to Session 8

Date: 12 March 2024 Time: 01:00-2:30 PM

About Resource Person:

Jagdish Lohar is currently pursuing his Ph.D. in Civil Engineering from Malaviya National Institute of Technology Jaipur, Rajasthan, specializing in 'Geosynthetics reinforced soil structures'. He holds a Master's degree in Structural Engineering and a Bachelor's degree in Civil Engineering. With a focus on sustainability, he has published 5 SCIE/Scopus indexed research articles and holds three Indian patents. His research interests encompass reinforced soil structures, waste recycling, sustainable construction practices, and earthen construction. Recognized for his contributions, he has been awarded for the best paper in two international conferences.

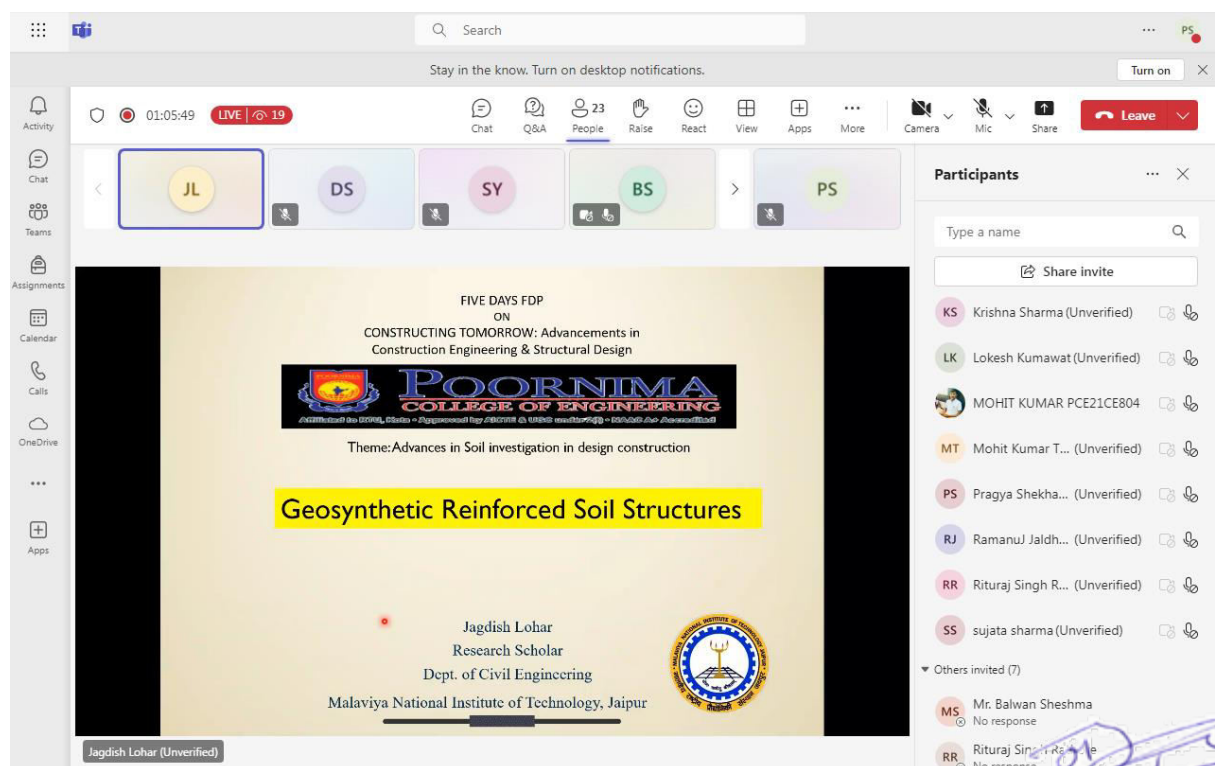

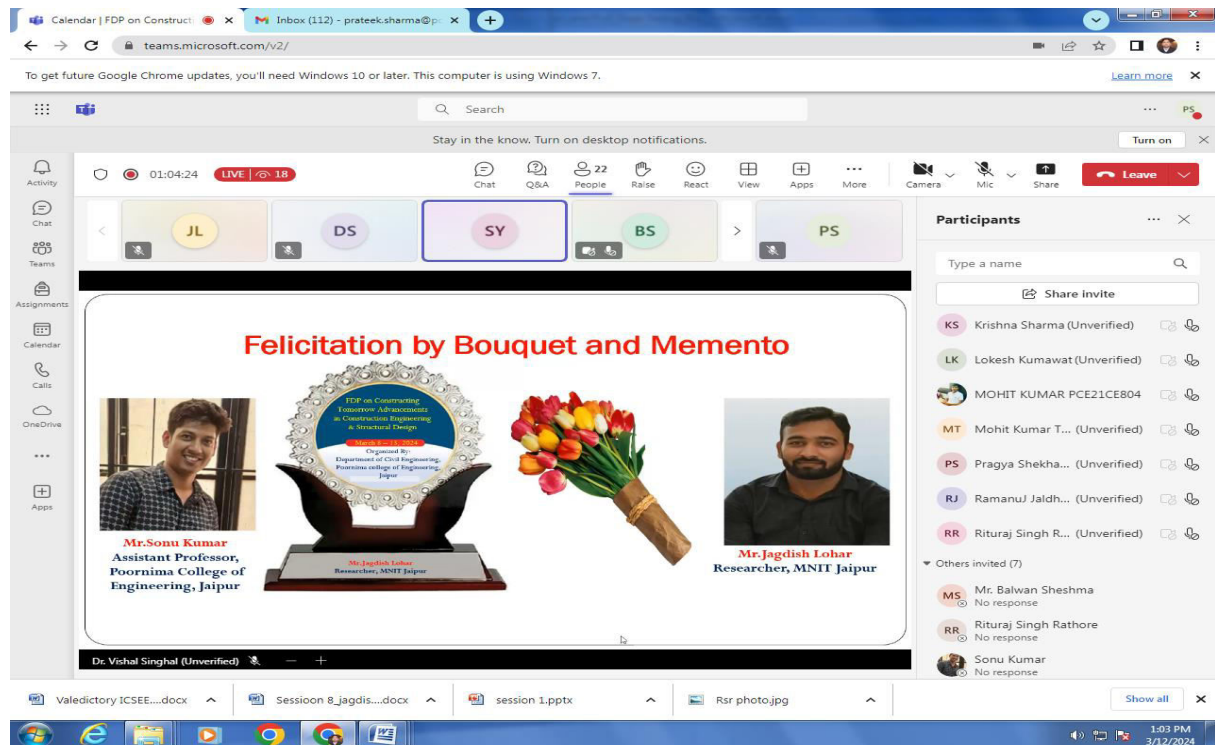

With over 4.5 years of academic experience, Jagdish has served as a nodal coordinator for Virtual labs and SPOC for NPTEL local chapter, showcasing his dedication to education. Additionally, he is actively engaged as an independent consultant in building construction projects, having successfully executed more than 50 projects. Jagdish possesses a diverse skill set, including knowledge of Intellectual property rights, proficiency in computer-aided design and drafting, and software packages like AutoCAD, SketchUp 3D, STAAD.Pro, and Plaxis.

About the Session:

Session No. 8 of Dr. Jagdish Lohar's lecture series provided valuable insights into the application of geosynthetics in geotechnical engineering. Attendees gained a deeper understanding of the functions, benefits, and practical applications of geosynthetics in soil stabilization, erosion control, and infrastructure development. The session underscored the importance of integrating geosynthetic solutions into geotechnical design and construction practices to enhance project performance, resilience, and sustainability.

About the Speaker:

Mr. Hitesh B. Lahoti, has completed his BE in Civil Engineering from North Maharashtra University and ME in Structural Engineering from Pune University. He has 1.5 years' experience in Execution work for various structures and 20 years' experience in R.C.C and Structural Design. Mr. Lahoti is Working on Staad.Pro since 2000 and imparting training on same since 2003. Mr. Lahoti has Proof Checked Multistoried buildings and Associated with Military Engineering Services for Design of Structures. He also performs Regularly offloading Analyzing and Designing works for various MNC's using STAAD.Pro and ETABS. He has designed towers for telecom companies like Airtel India and Conducted trainings on MS Tower for individual students in his Academy. He is Academic Training Partner for Bentley and Berkeley (ETABS & SAFE). His academy also imparts training for above said software's, Corporate Trainings and conducting courses on sharing basis in various Colleges and Institutes.

About the Session:

Session No. 9 of Mr. Hitesh Lahoti's lecture series provided valuable insights into the use of E-TABS software for designing high-rise buildings. Attendees gained a deeper understanding of the software's capabilities in structural analysis, modeling, and design optimization, enabling efficient and code-compliant design solutions for complex building projects. The session underscored the importance of leveraging advanced software tools like E-TABS to enhance the performance, safety, and sustainability of high-rise structures in today's architectural landscape.

Welcome to Session 10

Date: 13 March 2024

Time: 01:00-2:00 PM

About Speaker:

Er. Pradeep Garg sir has completed his BE (Hons) from MBM Engineering College, Jodhpur and MBA from Poddar Inst. of management, Jaipur. He has cleared the Indian Engineering Services exam (Batch 1994). He is currently working as Superintendent Engineer, Central Vista Project, CPWD, New Delhi. He is also Chairman, ICI, New Delhi Centre. He has contributed his expertise in the construction of several Central Govt. projects like Bridges and Flyovers in Delhi like Signature Bridge & Geeta Colony Bridge on River Yamuna, Punjabi Bagh & Dhaula Kuan Flyovers, Border Roads & Border Fencing on Indo-Pak and Indo-China Border, Institutional projects like ongoing Central Vista Project in Delhi, IIIT Kota, MNIT Jaipur, NIT Goa, IIT Goa, Central University Rajasthan and many more. He is also involved in Structural Design of Parliament library, Supreme Court Museum, Common Wealth Games Lawn Tennis Stadia in Delhi, Rajiv Gandhi Samadhi near Chennai and Several High-Rise buildings all over India.

Er. Garg is Active member of Indian Concrete Institute, Indian Road Congress and Indian Building Congress. He actively participates in drafting of Indian Codes by BIS. He delivers technical talks in technical forums and Institutions across India to share his knowledge and experiences.

About the Session:

Er. Pradeep Garg highlighted the growing emphasis on sustainability in civil engineering practices, with a focus on green building materials, energy-efficient design, and renewable energy integration.

The session explored innovative techniques such as modular construction, 3D printing, and prefabrication, which offer potential for reducing construction waste, lowering carbon footprint, and improving project efficiency.

Session No. 10 of Er. Pradeep Garg's lecture series provided valuable insights into the latest

trends shaping the field of civil engineering. Attendees gained a deeper understanding of the role of sustainability, innovation, digitalization, and resilience in driving the evolution of civil engineering practices. The session underscored the importance of embracing emerging technologies and interdisciplinary approaches to address contemporary challenges and create more sustainable and resilient built environments.

A Report on “OBE & NBA ACCREDITATION”

NAME OF ACTIVITY: OBE & NBA ACCREDITATION

DATE & DURATION: 7th to 11th August 2023

TYPE OF ACTIVITY: Co-Curricular

SPONSORS: NITTR, Chandigarh

SUPPORTERS: NITTR, Chandigarh

ORGANIZED BY: Research & Development Cell, PCE

LEARNING OUTCOMES:

LO1-Helps reach education goals through free expression, debates, cooperation, coordination ,etc.

LO2-Develop bits of constructive competition improve skills and competence

LO3-Develop sense of responsibility and belongingness

LO4-Develops decision-making skills

LO5-Develops leadership, managerial, and organizing skills

LO6-Creates opportunities to meet with other like-minded students for socialization, self-assessment and cultural awareness.

A Report on Five Days Short Term Training Program (STTP)

- ♦ **TITLE AND DURATION:** “Lab to Market 1.0 Recent Trends in Engineering” from December 09-13, 2023.
- ♦ **SPONSER:** Institute of Electrical and Electronics Engineers. (IEEE)
- ♦ **ORGANIZERS:** IEEE Student Branch (STB08621) and Electrical Engineering Department, Poornima College of Engineering, Jaipur.
- ♦ **LEARNING OUTCOMES:**
 1. Students / Learners will define the lab-to-market process and its significance in translating research and innovations into commercial products.
 2. Students / Learners will explore and analyze current trends in engineering fields such as IoT, AI, robotics, sustainable engineering, and materials science.
 3. Students / Learners would be able engage in hands-on activities and case studies that simulate the lab-to-market journey for engineering projects.
 4. Students / Learners will have lifelong learning in the broadest context of technological change.

ABOUT INSTITUTE
Poornima College of Engineering (PCE) has been granting superior education standards since its inception in 2002. The College has been named as a leading Engineering college in Rajasthan, India. It is ranked second among all the technical colleges affiliated with Rajasthan Technical University, Kota, India. PCE is moving ahead successfully to attain its vision mission to transform students into high-quality engineers and managers who may also enrich society by adhering to ethical culture, human values, and a sense of service to society and the nation. PCE came into existence to promote quality in professional & technical education in Jaipur, Rajasthan, and has a very strong research tradition and culture. What sets apart Poornima College of Engineering from other colleges in Jaipur, is its commitment to high-quality and industry-recognized delivery of education, ensuring the cultural and social enrichment of its students. Poornima brand synthesizes excellence through innovation, reliability, transparency, and professionalization of the highest order and instills faith and confidence among its members concerned in India and abroad. With student strength of more than 2000 students studying in 3 specializations of engineering (CSE, AI & DS, CSE (AI), CSE (IoT), CSE (EE), ME, Civil & IT), more than 300+ faculty members, highly qualified facilities, state-of-the-art infrastructure, good placements and industry-aided curriculum, PCE is spearheading its extraordinary voyage with the motto "Success is not a destination, it's a journey".

ABOUT DEPARTMENT
The journey of Department of Electrical Engineering was started in year 2010 with Poornima College of Engineering, Jaipur. National Board of Accreditation (NBA) accredited the undergraduate program of the department of Electrical Engineering in the year 2019 and 2017 for three years and in the year 2020-21 for one year. We are providing the amenities of infrastructure related to knowledge, research, experiments and training of multiple professions. The department has organized various workshops, seminars, expert lectures in every session such as workshops, seminars, expert lectures in every session such as workshop on MATLAB, Industrial Automation, Renewable energy etc. The department has been taking initiatives for the betterment of the students through technical, cultural and sports fields since its establishment. Most of the first year students have been placed in Infosys, Capgemini India Ltd., Glen Power, Adani Power, Pinnacle Infotech solutions etc.

Objectives of STTP
The main objectives of conducting STTP:
• To fill the gap between industry and academics and to transfer knowledge by imparting quality training to participants.
• To equip academics with skill and knowledge of recent trends in engineering.
Learning Outcomes:
• Conceptual clarity of the research process and methodology.
• Insights into different research methodology required to move from lab to market.
• Familiarity with tools and techniques required to implement the concepts of lab into the real ground.
Target Audience: Faculty, researchers and students from academic, industry and research & development sector.
Resource Person: Experts from MTIs and IITs and other reputed institutions as well as from research and manufacturing industries.
Registration Fee: There is no registration fee for the faculty and scholars from technical institutions.

ABOUT THE STTP:

As the latest technological advancements in the global digital era have made the teaching profession, a real challenge for 21st century educators, this Short Term Training Programme (STTP) shall provide a platform for enhancing the teaching-learning process. It aims to bring

Dr. Mahesh Bunde
B.E., M.E., Ph.D.
Director
Poornima College of Engineering
ISI-6, RICO Institutional Area
Ghatapada, JAIPUR

professors from various technical institutes and experts from the industry in India together under one roof so they may exchange best practices for instructing and training research scholars and students. This knowledge-sharing event intends to bring together academics from higher education, industry and researchers to discuss sustainable innovations.

Objectives of STTP

The main objectives of conducting STTP are

- To fill the gap between industry and academics and to transfer Knowledge by imparting quality training to participants.
- To equip academicians with skill and knowledge of recent trends in engineering.

Learning Outcomes:

After attending the programme, participants should have a

- Conceptual clarity of the research process and methodology.
- Insights into different research methodology required to move from lab to market.
- Familiarity with tools and techniques required to implement the concepts of labs into the real ground.

Target Audience:

Faculty, researchers and students from academic, industry and research & development sector.

Resource Person:

Experts from NITs and IITs and other reputed institutions as well as from research and manufacturing industries.

Registration Fee:

There is no registration fee for the faculty and scholars from technical institutions.

About Poornima College of Engineering

Poornima College of Engineering (PCE) has been practicing superior education standards since its inception in 2000. The College has maintained its eminence as a leading Engineering college

in Rajasthan, India. It is ranked second among all the technical colleges affiliated with Rajasthan Technical University, Kota, India. PCE is moving ahead successfully to attain its vision mission to transform students into high-quality engineers and managers who may also enrich society by adhering to ethical culture, human values, and a sense of service to society and the nation. PCE came into existence to promote quality in professional & technical education in Jaipur, Rajasthan, and has a very strong research orientation and culture. What sets apart Poornima College of Engineering from other colleges in Jaipur, is its commitment to high-quality and industry-recognized delivery of education, ensuring the cultural and social enrichment of its students. Poornima brand symbolizes excellence through innovations, reliability, transparency, and professionalism of the highest order and instills faith and confidence among all members concerned in India and abroad. With student strength of more than 2000 students studying in 9 specializations of engineering (CSE, AI & DS, CSE (AI), CSE (Cyber), ECE, EE, ME, Civil & IT), more than 3.5 Lac square feet of built-up area, highly qualified faculties, state of the art infrastructure, good placements and industry-led curriculum, PCE is spearheading its extraordinary voyage with the motto 'Success is not a destination, it's a journey.

About Electrical Engineering Department

The journey of Department of Electrical Engineering was started in year 2000 with Poornima College of Engineering, Jaipur. National Board of Accreditation (NBA) accredited the undergraduate program of the department of Electrical Engineering in the year 2009 and 2017 for three years and in the year 2020-21 for one year. We are providing the amenities of infrastructure related to knowledge, research, experiments and training of multiple professions. The department has organised various workshops, seminars expert lectures in every session such as workshops, seminars, expert lectures in every session such as workshop on MATLAB, Industrial Automation, Renewable energy etc. The department has been taking initiatives for versatile enhancement of the students through technical, cultural and sports fests since the establishment. Most of the final year students have been placed in Infosys, Capgemini India Ltd., Gram Power, Adani Power, Pinnacle Infotech solutions etc.

Keynote Speaker

1. **Sh. Narinder Singh Jassal**
Sr. Principal Scientist
Head-Business Development Group (BDG),
Coordinator DSIR-TePP Outreach cum Cluster Innovation Centre (DSIR-TOCIC) (PRISM Scheme),
Coordinator CSIR Integrated Skill Initiative Programme,
Former Principal Indo-Swiss Training Centre (ISTC),
CSIR-Central Scientific Instruments Organisation (CSIR-CSIO),
(Ministry of Science and Technology, Govt of India),
Sector 30-C, Chandigarh

Topic: Impact of Innovation, Start-up & Entrepreneurship on nation economic and funding opportunities through DSIR-PRISM Scheme

Experts/Speakers:

2. **Dr. Kailash Chandra Sharma**
Assistant Professor (Grade-I),
Department of Electrical Engineering,
Dr B R Ambedkar National Institute of Technology Jalandhar

Topic: Electricity Market Operations with Renewable Energy Resources

3. Dr. Sanjay Tolani

Assistant Professor, Department of Electrical Engineering,
Sardar Vallabhbhai National Institute of Technology Surat,
Surat, Gujarat (India)

Topic: Power Converter Control Design using Loop Shaping Technique: Methodology & Discrete-Time Implementation

4. Dr. Prabhjot Singh

CEO,
Exergy Innovation Pvt. Ltd.
Ambala Haryana

Topic: Lab to Start-up: A Journey

5. Dr. Deepak Kumar

Associate Professor

Topic: Model Order Reduction

6. Dr. Kishor V. Bhadane

Dean, Research and Development (R&D),

Associate Professor in Electrical Engineering,

Amrutvahini College of Engineering, Sangamner

Maharashtra, India

Topic: Lab to start-up in the field of Electrical Engineering

7. **Dr. Nitin B. Bhiwapurkar**

Former Program Manager

Mercedes Benz Research and Development India

Head Application Development and Engineering Support

Curtis Instrument India Pvt. Ltd.

Pune Maharashtra

Topic: Role of Instrumentation in Product Development

8. **Dr. Nand Kishor Gupta**

Associate Professor,

Department of Electrical and Electronics Engineering,

Poornima University, Jaipur

Topic: Impact of AI and ML in current Engineering Scenario

9. **Dr. Kuldeep Singh Rathore**

Assistant Professor, Electrical Engineering Department &
Administrative Officer, Academic Unit-01
University Institute of Engineering,
Chandigarh University

Topic: Application of Power Converters for the control of Electrical Machine

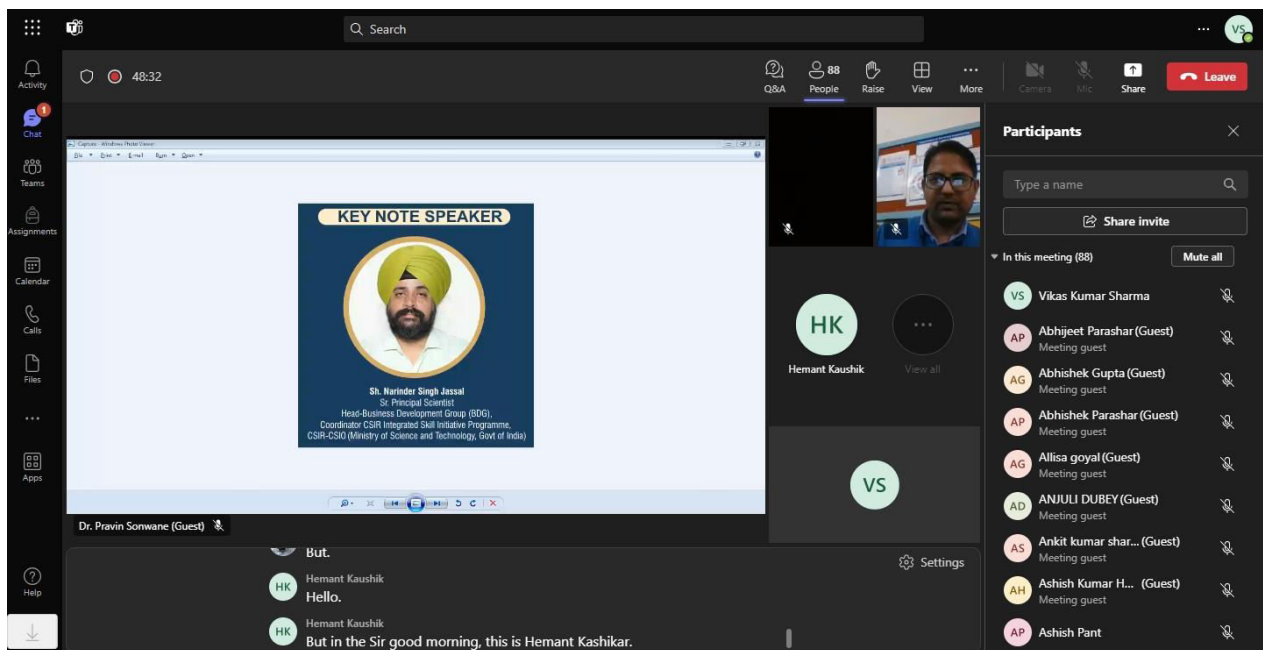

10. **Dr. Vivek Upadhaya**

Assistant Professor,
Department of Electrical and Electronics Engineering,
Poornima University, Jaipur

Topic: Modern Engineering Tools for Medical Imaging

Balanced Truncation [1]

"Balanced" term stands for the systems such that input to state coupling and the state to output coupling are weighted equally so that the state components which are weakly coupled to both the input and output, are discarded.

The balanced realization is a minimal realization of an asymptotically stable system such that controllability and observability Gramians are equal and diagonal.

A lower order truncated model is then obtained by eliminating the least controllable and/or least observable part of the transformed system.

A Report on "Recent Trends in Communication, Computing & Networking"

NAME OF ACTIVITY: "Recent Trends in Communication, Computing & Networking"

DATE & DURATION: 08-12 January 2024

TYPE OF ACTIVITY: Extra-Curricular

ORGANIZED BY: Department of Electronics & Communication Engineering

LEARNING OUTCOMES:

LO1-Students will be able to enhance their knowledge of Computing Communication.

LO2-Students will be able to recognize the different scopes of Electronics Engineering in Computing Communication.

LO3-Students will be able to analyze their future perspective in the field of the Computing Communication.

Department of Electronics & Communication Engineering, Poornima College of Engineering, Jaipur organized Four Days IEEE, RTU Online Refresher program on "Recent Trends in Communication, Computing & Networking" from January 08-12, 2024 in three sessions daily through online mode.

The objective of this refresher program is intended to impart knowledge and training on the fundamentals of Recent Trends in Communication, Computing & Networking, its use in various domains via medical, agricultural, public sector etc. On 8th January program was inaugurated by **Chief Guest Mr. Bhagirath Singh, IRRS, Sr. Deputy Wireless Adviser, Govt. of India, Ministry of Communications, New Delhi** (Chief Guest) Jaipur was Guest of Honor of the program. Architect, Rahul singhi, Director. Poornima Group, Dr. Mahesh M. Bundeale, Director, PCE, Dr. Pankaj Dhemia, Vice Principal, PCE and Dr. Garima Mathur, HOD, department of Electronics & Communication Engineering, PCE also graced the program. In this program more than 200 faculties from all over India got registered. 15 Technical Sessions were scheduled. Eminent speakers from all over India gave their knowledge on the upcoming topics like Peak to Power Average Ratio Analysis in 5G Waveform, Optical Fiber Based Surface Plasmon Resonance Sensors, Demystifying Aircraft Ad-hoc Networks, Flexible Optical Access Networks & Applications, Role of Microwaves in Communication: Frequency Selective Surfaces, Absorbers & Resorbers, Simulation of Wireless Network Using NS3, Generative Artificial Intelligence: Tools, Model & Applications, Industrial Need & Application of Smart Sensors & IoT, Computer Vision Based Bio-medical Image Processing Using Machine Learning, Machine learning & Its Applications: Different Prepective, On the Hyper complex Numbers & Normed Division Algebra of All Dimensions: A Unified Multiplication, etc Speakers also shared their thoughts that Smart Sensors & IoT applications in Healthcare, Agriculture, Business and Security etc. AI is an emerging technology that shall be used almost all applications / technologies/ systems in one or other form.

DAY 1:- SESSION 1

Peak to Power Average Ratio Analysis in 5G Waveform

Dr. Arun Kumar, Professor New Horizon College of Engg., Bangaluru

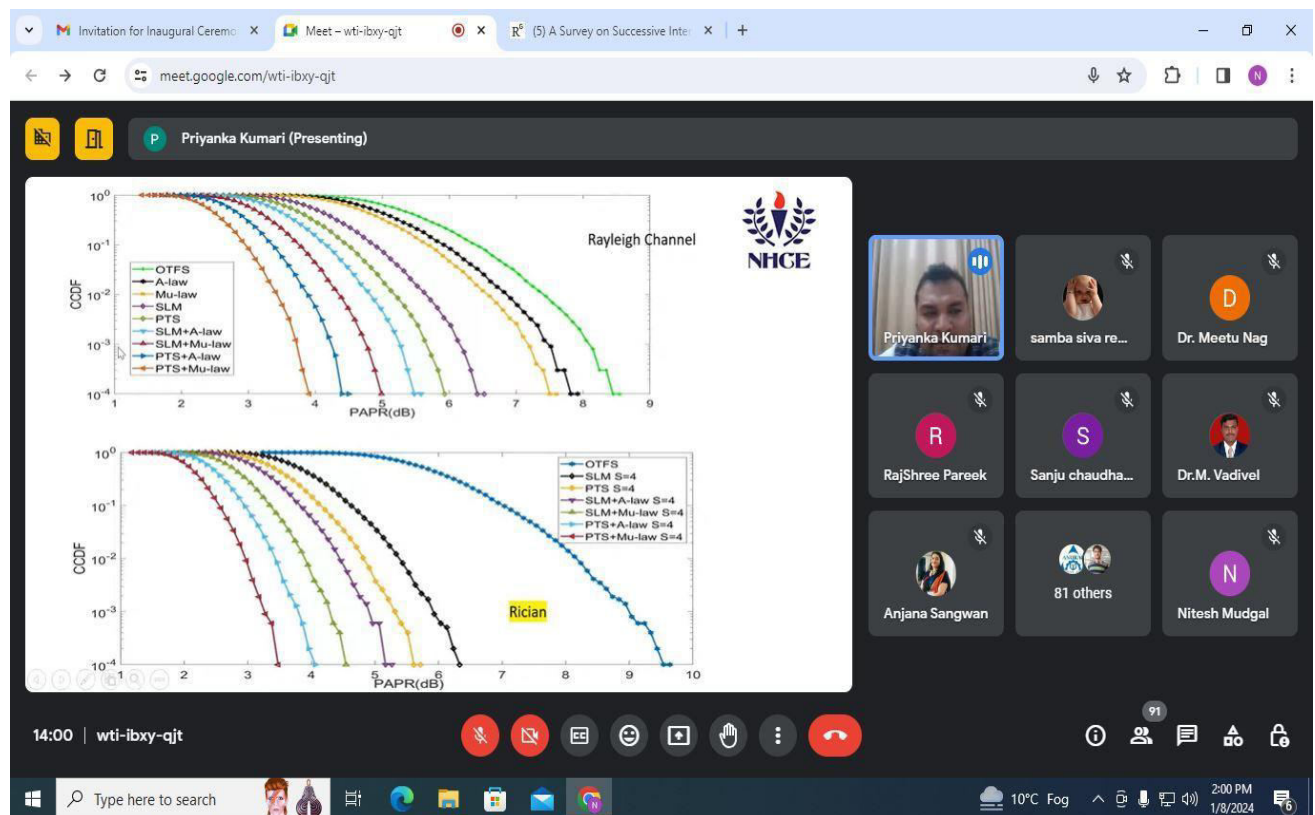

Multicarrier Waveform (MCW) has several advantages and plays a very important role in cellular systems. Fifth generation (5G) MCW such as Non-Orthogonal Multiple Access (NOMA) and Filter Bank Multicarrier (FBMC) are thought to be important in 5G implementation. High Peak to Average Power Ratio (PAPR) is seen as a serious concern in MCW since it reduces the efficiency of amplifier use in the user devices. The paper presents a novel Divergence Selective Mapping (DSL_M) and Divergence Partial Transmission Sequence (D-PTS) for 5G waveforms. It is seen that the proposed D-SLM and PTS lower PAPR with low computational complexity. The work highlighted a combination of multi-data block partial transmit schemes along with tone reservation. In this, an overlapping factor is used to determine the number of data blocks for every group. Here, considering only those data blocks that have minimum signal power, the use of DSL_M and DPTS are required to eliminate the segment's peaks. Simulation results reveal that the suggested hybrid technique proves to be better than the conventional PTS scheme. Furthermore, the power saving performance of FBMC and NOMA is compared with the Orthogonal Frequency Division Multiplexing (OFDM) waveform.

Optical Fiber Based Surface Plasmon Resonance Sensors

Dr. Manish Tiwari, Professor & Head Manipal University Jaipur

Surface Plasmon resonance technique in collaboration with optical fiber technology has brought tremendous advancements in sensing of various physical, chemical, and biochemical parameters. In this review article, we present the principle of SPR technique for sensing and various designs of the fiber optic SPR probe reported for the enhancement of the sensitivity of the sensor. In addition, we present few examples of the surface Plasmon resonance- (SPR-) based fiber optic sensors. The present review may provide researchers valuable information regarding fiber optic SPR sensors and encourage them to take this area for further research and development.

The screenshot shows a Google Meet interface with a presentation slide titled "The Nonlinear Schrödinger Equation". The slide contains the following text:

Assuming that the input electric field propagates in the z direction and is polarized in the x direction,

$$\frac{\partial A}{\partial z} = -\frac{\alpha}{2} A + \sum_{n=2}^{\infty} \frac{i^n}{n!} \beta_n \frac{\partial^n A}{\partial T^n} + i\gamma \left(\frac{w}{1 + \frac{i}{n_b} \frac{\partial}{\partial T}} \right) \left(A \int_{-\infty}^{\infty} R(T') A(z, T-T')^2 dT' \right)$$

where I, II, III, IV and V terms on R.H.S. represent linear attenuation, dispersion, Kerr effect, self steepening and stimulated Raman scattering respectively, and the quantities in the above equation denote the following

- $A(z, t)$: the envelope of the optical field,
- T : time,
- β_n : the n th derivative of the propagation constant β
- γ : the nonlinear coefficient.

DAY 2:- SESSION 2

Demystifying Aircraft Ad-hoc Networks

Dr. Seema Verma, Professor NITTTR Bhopal

Millimeter-wave (mmWave) networking represents a core technology to meet the demanding bandwidth requirements of emerging connected vehicles. However, the feasibility of mmWave vehicle-to-everything (V2X) connectivity has long been questioned. One major doubt lies in how the highly directional mmWave links can sustain under high mobility. In this paper, we present the first comprehensive reality check of mmWave V2X networks. We deploy an experimental tested to mimic a typical mmWave V2X scenario, and customize a COTS mmWave radio to enable microscopic investigation of the channel and the link. We further construct a high-fidelity 3D ray-tracer to reproduce the mmWave characteristics at scale. With this toolset, we study the mmWave V2X coverage, mobility and blockage, codebook/beam management, and spatial multiplexing. Our measurement debunks some common misperceptions of mmWave V2X networks. In particular, due to the constrained roadway network structures, we find the beam management can be handled easily by the often-denounced beam scanning schemes, as long as the codebook is properly designed. Blockage can be almost eliminated through proper base station deployment and cooperation. Highly effective spatial multiplexing can be realized even without sophisticated MIMO radios. Our work points to possible ways to realize efficient and reliable mmWave networks under high mobility, while maintaining the simplicity of standard network protocols.

DAY 2:- SESSION 3

Flexible Optical Access Networks & Applications

Dr. Amit Kumar Garg, Assistant Professor Indian Institute Information and Technology Kota

Flexible line rate is one of the key features for future optical access networks offering optimized throughput to multiple fiber-to-the-X users with different channel conditions and service priority; meanwhile, considerations should focus on technological transition from single-wavelength 50G higher-speed PON (G.hsp) based on optical direct detection systems to future digital coherent technology 100G/λ and beyond. In this paper, we propose a single-carrier modulation scheme that can achieve flexible line rates with arbitrary rational oversampling ratios without altering sampling rate of the transceiver. In the proposed scheme, the waveforms are based on the well-shaped Dirichlet kernel using discrete Fourier transforms (DFT). However, in comparison to conventional single-carrier frequency-division multiplexing (SC-FDM), the Dirichlet waveform of the proposed modulation algorithm is real-valued; in such a way, the proposed algorithm can be readily applied for both pulse amplitude modulation (PAM) for direct detection PON and, with forward compatibility to, future digital coherent PON with e.g., quadrature amplitude modulation (QAM). To validate the feasibility of the proposed system, experiments were carried out and flexible data rates from 62.1 to 174.5 Gbit/s with up to 8-ary PAM was successfully demonstrated for IM/DD-based PON using a fixed sampling rate at 64 GSa/s. The experiments show that the oversampling ratio can be arbitrary rational numbers no less than 1 to adjust the signal Baud rate. As a result, the proposed scheme is promising for offering optimal bandwidth allocation for current IM/DD-based and future coherent PON.

The screenshot shows a Google Meet interface with a presentation slide titled "Assumptions". The slide contains two tables and a text note.

DAY 3:- SESSION 1

Role of Microwaves in Communication: Frequency Selective Surfaces, Absorbers & Rasorbers

Dr. Sanjeev Yadav, Associate Professor Central University, Jammu

A frequency-selective surface (FSS) can be employed as a spatial filter for incident electromagnetic (EM) waves, which are most often used in redone design to protect the antennas and to reduce the radar cross section (RCS) of the antenna system [1] – [3] . In-band signals transmit through the FSS with little power loss, while out-of-band incoming waves are reflected strongly, making them detectable by radar. Thus, to further reduce the biostatic/multistate RCS of the redone, circuit analog absorbers or absorbing materials are introduced into the redone design. As a result, the out-of-band signals are absorbed and reflection is reduced.

DAY 3:- SESSION 2

Simulation of Wireless Network Using NS3Dr

Dr. Nagaraj M. Lutimath, Associate Professor Information Science & Engineering, Bengaluru

NS3 Wireless Simulation builds a dynamic library for future events maintained in sorted Event List and supports Events model packet transmission, receipt, timers. We Assist Engineering students and Research scholars in Implementing Ns3 Wireless simulation Projects with best customer support and 100% Guaranteed Output.

DAY 3:- SESSION 3

Generative Artificial Intelligence: Tools, Model & Applications

Dr. Aditya Sinha, Assistant Professor Manipal University Jaipur

Generative AI is powered by foundation models (large AI models) that can multi-task and perform out-of-the-box tasks, including summarization, Q&A, classification, and more. Plus, with minimal training required, foundation models can be adapted for targeted use cases with very little example data.

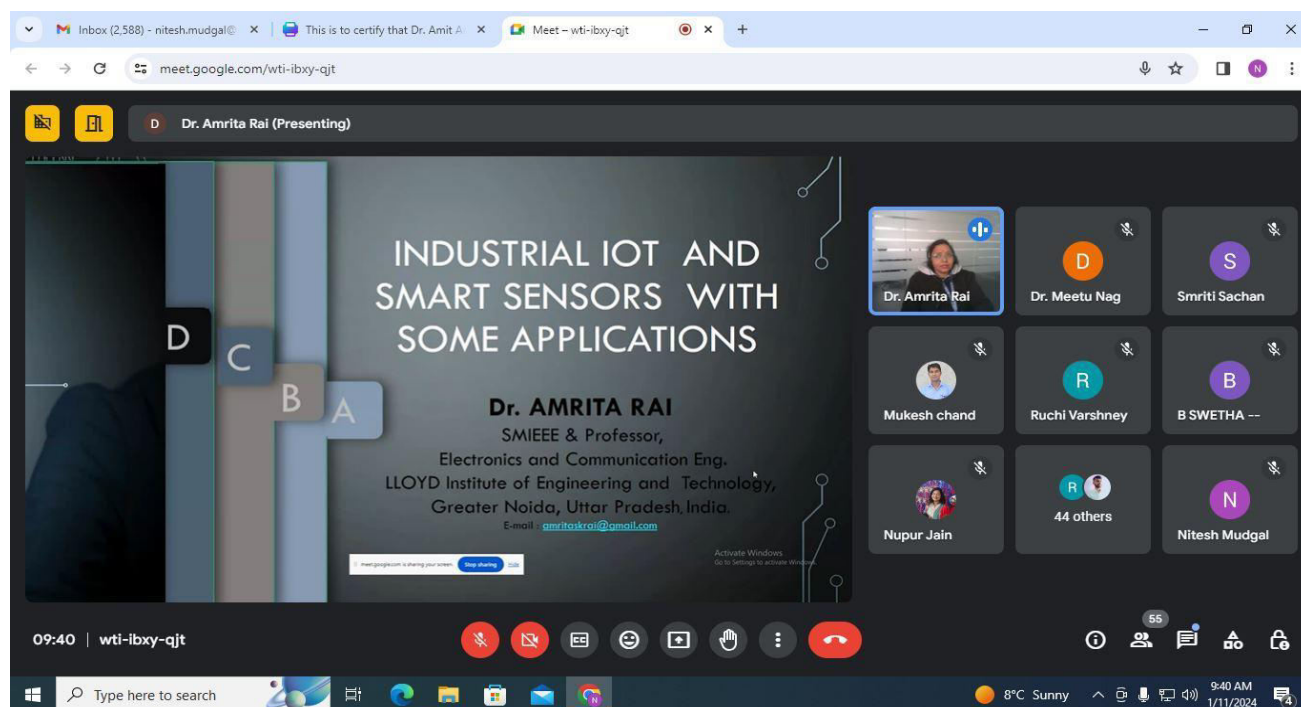

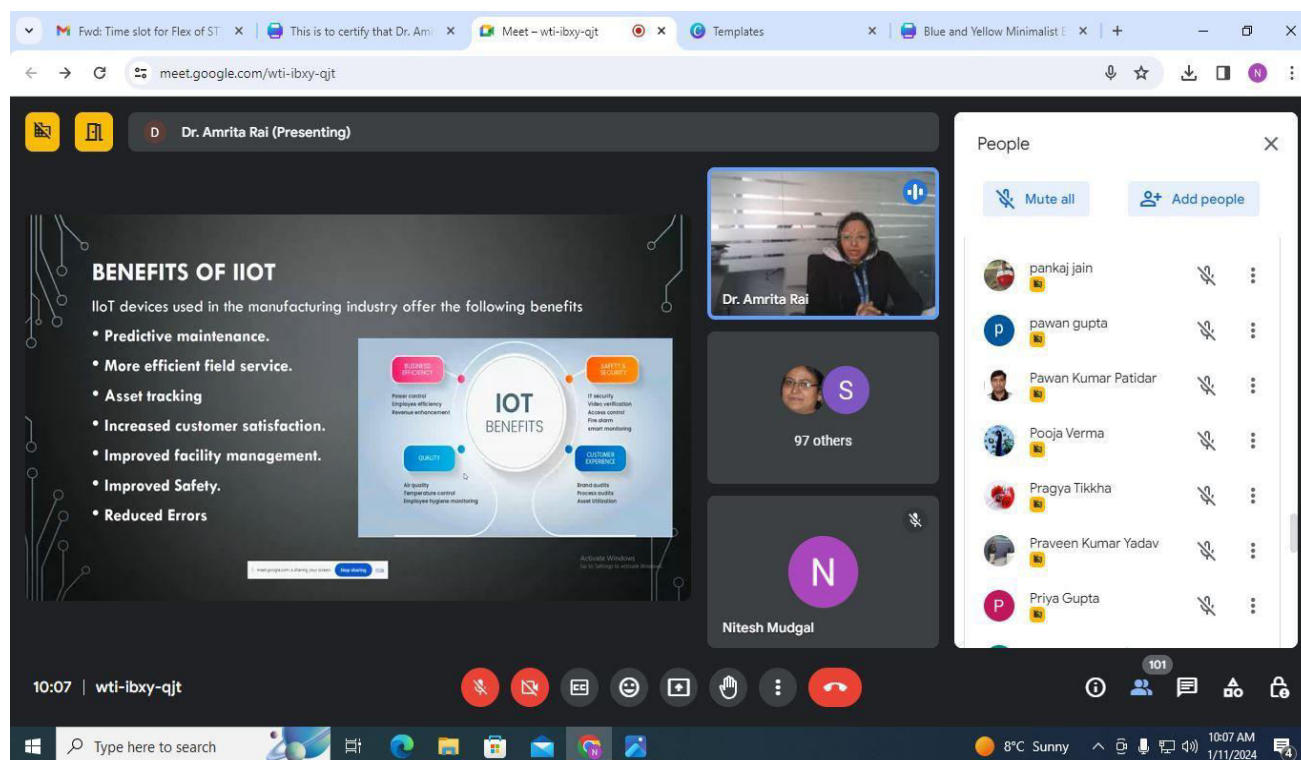

DAY 4:- SESSION 1

Industrial Need & Application of Smart Sensors & IoT

Dr. Amrita Rai, ProfessorLloyd Institute of Engineering & Technology, Greater Noida

Smart sensors are used to monitor different industrial processes, collecting data, taking measurement, and sending the data to centralized cloud computing platforms where information is collected and analyzed for patterns. This data can be monitored by key decision makers at any time.

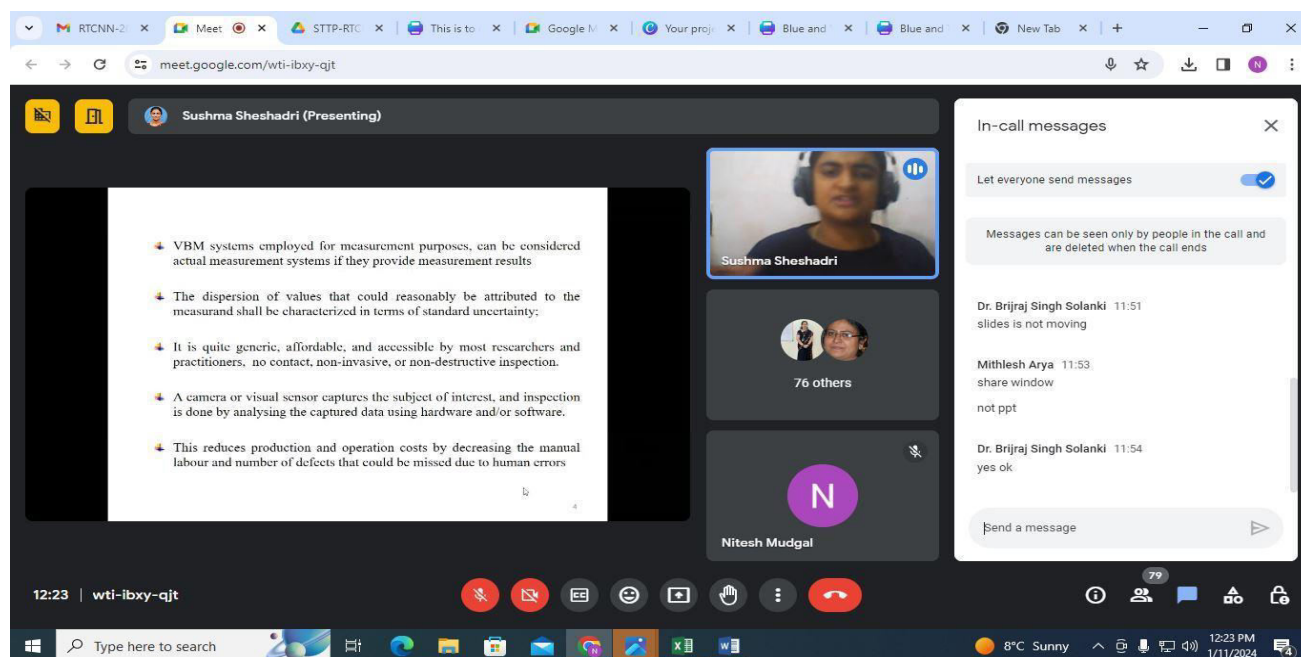

DAY 4:- SESSION 2

Computer Vision Based Bio-medical Image Processing Using Machine Learning

Sushma Sheshadri, Assistant Professor **Maharaja Institute of Technology, Mysore**

Computer vision is a branch of artificial intelligence and computer science that enables computers to acquire a high level of comprehension from digital images or recordings, analogous to how humans perceive and interpret visual information. It involves the development of algorithms and techniques that enable machines to analyze visual data and derive meaningful information from it. Computer vision algorithms for biomedical image processing typically explore and present the latest advancements, research, and applications of computer vision techniques explicitly tailored to analyzing biomedical images.

This Special Issue aims to bring together researchers and practitioners from the fields of computer vision and biomedical imaging to showcase cutting-edge developments in computer vision algorithms and their applications in biomedical image processing. The goal is to foster the exchange of knowledge and ideas and to promote the dissemination of high-quality research in this interdisciplinary area.

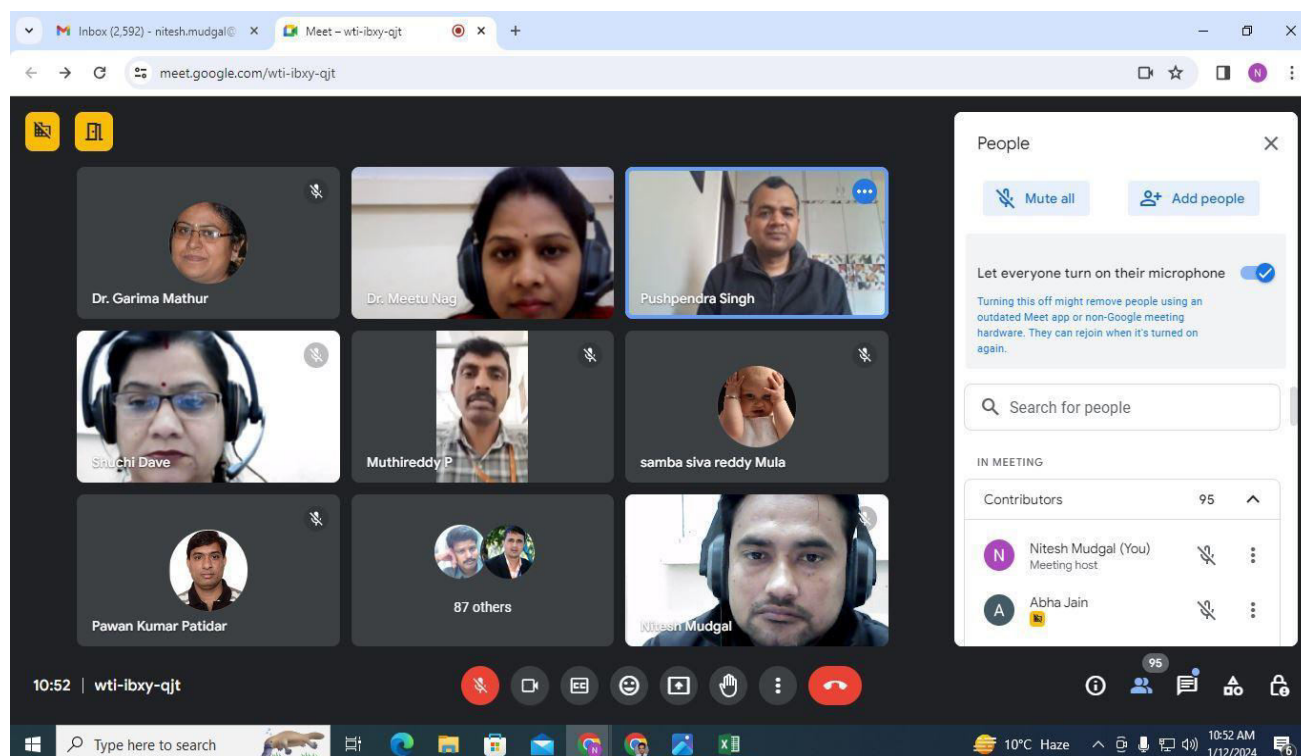

DAY 5:- SESSION 1

On the Hyper complex Numbers & Normed Division Algebra of All Dimensions: A Unified Multiplication

Dr. Pushpendra Singh, Associate Professor School of Engineering, JNU Delhi

Mathematics is the mother of all the sciences, engineering and technology, and a normed division algebra of all finite dimensions is the mathematical holy grail. In search of a real three-dimensional, normed, associative, division algebra, Hamilton discovered quaternion's that form a non-commutative division algebra of quadruples. Later works showed that there are only four real division algebras with 1, 2, 4, and 8 dimensions. This work overcomes this limitation and introduces generalized hyper complex numbers of all dimensions that are extensions of the traditional complex numbers. The space of these numbers forms non-distributive normed division algebra that is extendable to all finite dimensions. To obtain these extensions, we defined a unified multiplication, designated as scaling and rotative multiplication, fully compatible with the existing multiplication. Therefore, these numbers and the corresponding algebras reduce to distributive normed algebras for dimensions 1 and 2. Thus, this work presents a generalization of \mathbb{C} in higher dimensions along with interesting insights into the geometry of the vectors in the corresponding spaces.

DAY 5:- SESSION 2

Intelligent Algorithms For Design of Digital Communication Channel Equalizer

Dr. Satyasai Jagannath Nanda, Associate Professor MNIT Jaipur

Wireless communication systems have evolved and offered more smart and advanced systems like ad hoc and sensor-based infrastructure fewer networks. These networks are evaluated with two fundamental parameters including data rate and spectral efficiency. To achieve a high data rate and robust wireless communication, the most significant task is channel equalization at the receiver side. The transmitted data symbols when passing through the wireless channel suffer from various types of impairments, such as fading, Doppler shifts, and Intersymbol Interference (ISI), and degraded the overall network performance. To mitigate channel-related impairments, many channel equalization algorithms have been proposed for communication systems. The channel equalization problem can also be solved as a classification problem by using Machine Learning (ML) methods. In this paper, channel equalization is performed by using ML techniques in terms of Bit Error Rate (BER) analysis and comparison. Radial Basis Functions (RBFs), Multilayer Perception (MLP), Support Vector Machines (SVM), Functional Link Artificial Neural Network (FLANN), Long-Short Term Memory (LSTM), and Polynomial-based Neural Networks (NNs) are adopted for channel equalization.

POORNIMA COLLEGE OF ENGINEERING

Poornima College of Engineering (PCE) is one of the premier self-financed Institute approved by AICTE and affiliated to Rajasthan Technical University (RTU), Kota, offering Graduate Courses in Engineering. It was established in the year 2000 in Jaipur under the aegis of the Shanti Education Society. It has achieved 2nd rank under the Quality Index Value (QIV) evaluated by affiliating university RTU, Kota for the last 5 years among all affiliated colleges (govt. and self-financed). The Institute currently offers Ten specializations [CSE, CSE (Regional language), AI&DS, CSE (AI), CSE (Cyber Security), ECE, EE, ME, CIVIL, and IT] of engineering undergraduate programs with a student strength of more than 2000 students. PCE is the only institute in overall Rajasthan to start an engineering course in regional language thereby promoting and preserving regional language.

MECHANICAL ENGINEERING DEPARTMENT

The Department of Mechanical Engineering was established in the year 2004 at Poornima college of Engineering, Jaipur. The curricular, co-curricular and extracurricular activities provide exposure to students and faculty members in the areas of latest developments; therefore, students of the mechanical engineering department are associated with renowned organizations' throughout the world. The laboratories of the department are equipped with modern and latest instruments. The department organizes international conferences, seminars, workshops, and symposia in collaboration with well reputed organizations. The department also organizes special lectures in various areas by invited speakers from IITs, foreign universities, and experts from industries.

ABOUT THE PROGRAMME

Energy is essential for all manufacturing processes. Efficient source of energy can enhance the sustainability of advance manufacturing. However development of efficient sources of energy to meet the need of circular manufacturing is challenging. Selection of advance manufacturing processes for a product development based on energy is also difficult. This one week short term training programme will be beneficial for the academics and researchers working in diversified areas of energy and manufacturing engineering.

CONTENTS

The following topics, which are essential to energy conservation techniques and advances in manufacturing, will be covered during the programme.

- ☐ Advancements in Energy
- ☐ Vertical Axis Wind Turbine
- ☐ Additive Manufacturing
- ☐ Energy Audit
- ☐ Micro Drilling etc.

OBJECTIVES OF THE PROGRAMME

To provide an exposure to the participants about recent advances in energy and manufacturing.

About the activity

One Week Short Term Training Programme was scheduled from September 25-29, 2023 by the Department of Mechanical Engineering of Poornima College of Engineering Jaipur. Session was begun from basic introduction of energy and manufacturing concepts. Speakers spoke about their current research trends. From this short term training programme participants and students and faculties have benefited. Faculty members and research scholars from mechanical engineering and allied branches benefited by attending this STP.

.Dr. Ravi Kumar Gupta, Er. S. M. Khaja, Dr. Ashok Kumar, Dr. H. K. Singh and Dr. A. K. Maurya have invited to deliver the sessions during online short term training programme. Participants of across the country have benefited from the delivered sessions by the invited experts. During the session panellist was Dr. Narayan Lal Jain, HOD Mechanical Engineering Department and Dr. Surendra Kumar Saini, Coordinator & Faculty in Mechanical Engineering Department.

Dear All,

This is to let you all know that the **Department of Mechanical Engineering, Poornima College of Engineering** is organizing a Five-day online Short-Term Training Programme (STTP) on **Advancements in Energy and Manufacturing Engineering** during **September 25-29, 2023**.

The aim of this STTP is to inculcate the participants with the advancements of energy and manufacturing. this STTP is targeted towards faculty members/ research Scholars from Colleges/Institutions/Universities/Industries. the domain experts from the reputed institutions/industries are invited as speakers to deliver Expert Lectures.

For more details, please find the attached brochure of the FDP.

Click here for FREE registration: <https://rb.gv/14fm>

Note: E-certificate will be given to all participants

After registration, the attendees will receive a confirmation email containing information about joining the lecture.
