Course Feedback Form-Even Semester 2023-24 I YEAR

Dear Student,

As you are aware that the first year department is always tried to improve the performance in terms of inculcating various attributes in them as desired by the Industries / Entrepreneurship / Society and changing the Vision, Mission, PEOs, PSOs, COs & their targets considering inputs from its stakeholders from time to time, you are requested to give your valuable inputs thoughtfully that will help us further improving the systems & processes in future.
This feedback will also help us in correcting teaching-learning processes and mechanisms along with the contents to be delivered to you in future.

Session:- Even Sem 2023-24

Please put a tick mark as appropriate response against choices given. Comments can be added at appropriate places.

The respondent's email (**2023pceecakash002@poornima.org**) was recorded on submission of this form.

Course Feedback Form-ODD Semester 2023-24 I YEAR

Dear Student,

As you are aware that the first year department is always tried to improve the performance in terms of inculcating various attributes in them as desired by the Industries / Entrepreneurship / Society and changing the Vision, Mission, PEOs, PSOs, COs & their targets considering inputs from its stakeholders from time to time, you are requested to give your valuable inputs thoughtfully that will help us further improving the systems & processes in future.
This feedback will also help us in correcting teaching-learning processes and mechanisms along with the contents to be delivered to you in future.

Session:- ODD Sem 2023-24

Please put a tick mark as appropriate response against choices given. Comments can be added at appropriate places.

The respondent's email (**2023pceitnirmal035@poornima.org**) was recorded on submission of this form.

Course Feedback Form-Even Sem. 2023-24 (IT)-IV YEAR

Dear Student,

As you are aware that the department of Electrical Engineering is always trying to improve the performance in terms of inculcating various attributes in them as desired by the Industries / Entrepreneurship / Society and changing the Vision, Mission, PEOs, PSOs, COs & their targets considering inputs from its stakeholders from time to time, you are requested to give your valuable inputs thoughtfully that will help us further improving the systems & processes in future.
This feedback will also help us in correcting teaching-learning processes and mechanisms along with the contents to be delivered to you in future.

Session:- Even Sem. 2023-24

Please put a tick mark as appropriate response against choices given. Comments can be added at appropriate places.

Course Feedback Form-Even Sem. 2023-24 (EE)-IV YEAR

Dear Student,

As you are aware that the department of Electrical Engineering is always trying to improve the performance in terms of inculcating various attributes in them as desired by the Industries / Entrepreneurship / Society and changing the Vision, Mission, PEOs, PSOs, COs & their targets considering inputs from its stakeholders from time to time, you are requested to give your valuable inputs thoughtfully that will help us further improving the systems & processes in future.
This feedback will also help us in correcting teaching-learning processes and mechanisms along with the contents to be delivered to you in future.

Session:- Even Sem. 2023-24

Please put a tick mark as appropriate response against choices given. Comments can be added at appropriate places.

The respondent's email (**2020pceeepriyanshi14@poornima.org**) was recorded on submission of this form.

SUGGESTIONS

33. Whether any modification is needed in the Vision, Mission, PEOs and PSOs statements? * Suggestions:

The vision and mission of the department and the PEOs of the program are defined by taking the views of various stakeholders associated with the Institute/Department, latest developments, future scope and needs of the society.

34. Whether curriculum promotes start up, entrepreneurship, and higher studies? * Suggestions

Curriculum Integration: One immediate action that schools can take is to weave entrepreneurship into their curriculum. This can involve offering elective courses on entrepreneurship, incorporating entrepreneurial projects into core courses, and providing workshops on key business skills.

35. Do you feel any curriculum gap for achieving employability, entrepreneurship, and higher studies? comments *

Curriculum gaps can vary depending on the field and region, but generally, fostering skills like critical thinking, communication, and adaptability can enhance both employability and entrepreneurship. Integrating practical experiences, like internships or project-based learning

CELEBRATING 25 YEARS OF EXCELLENCE

DEPARTMENT OF CIVIL ENGINEERING

Session 2023-2024 (~~Even~~/Odd Semester)

COURSE FEEDBACK FORM

Date:

Dear Student,

As you are aware that the department of Civil Engineering is always trying to improve the performance in terms of inculcating various attributes in them as desired by the Industries / Entrepreneurship / Society and changing the Vision, Mission, PEOs, PSOs, COs & their targets considering inputs from its stakeholders from time to time, you are requested to give your valuable inputs thoughtfully that will help us further improving the systems & processes in future. This feedback will also help us in correcting teaching-learning processes and mechanisms along with the contents to be delivered to you in future.

Please put a tick mark as appropriate response against choices given. Comments can be added at appropriate places.

38. What additional activities / training you have done on your own to fulfill requirements of CO, PO, PSO, PEO, Vision, and Mission?

knowledge about RMC plants

39. What changes would you recommend to improve this course?

to provide practical knowledge

40. What did you like best about your faculty teaching?

teaching skills

41. What did you like least about your faculty's teaching?

communicated

42. What do you recommend for improving CO attainment?

to improve the teaching skills

ANNEXURE-I

A. Vision of the Institute

To create knowledge based society with scientific temper, team spirit and dignity of labor to face the global competitive challenges

B. Mission of the Institute

To evolve and develop skill based systems for effective delivery of knowledge so as to equip young professionals with dedication commitment to excellence in all spheres of life

C. Vision of the Department:

To become a globally recognized centre of Civil Engineering through excellence in technical education, interdisciplinary research a innovation.

D. Mission of the Department:

- To develop professional **skills with outstanding knowledge**.
- To enhance **research & development** in emerging areas of civil engineering.
- Enhancing **linkages with alumni and industry**.
- To produce **ethically able, humane and creative global leaders**.

E. Program Educational Objectives (PEOs)

PEO 1 Graduates will be able to apply fundamental principles of science, mathematics and engineering using modern tools to solve societal and environmental problems.

PEO 2: Graduates will be able to use their practical, field survey, computer and analytic skills to build industry ready engineers to solve multi-disciplinary sustainable projects.

PEO 3: Graduate applies innovative ideas to improve the technical competency in engineering decisions, lifelong learning, to equip leadership qualities in diverse teams, promote and practice appropriate ethical morals to become professional engineers.

F. Program Outcomes (POs)

PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

G. Program Specific Outcomes

PSO1: The graduates will have the ability to **plan, design** and **quality execution of construction projects.**

PSO2: The graduates of the civil engineering program will have the ability to **solve** problems in the **structural, construction management, hydraulics, geotechnical, transportation** and **environmental** disciplines of civil engineering.

PSO3: Graduates will be able to cognizance of **social awareness, interdisciplinary aspects** and **environmental** necessity along with ethical responsibility to have a successful **career** and to become an **entrepreneur**.

ALUMNI FEEDBACK FORM

Dear Alumni,

Greetings from your own Alma matter!

As you know, your institute is one of the pioneer institutes to impart pragmatic technical education. It's because of you all who could bring PCE to this status. The Institute is NBA accredited and ranked second by Rajasthan Technical Institution, Kota. Understanding, 'Success is not a destination, it's a journey', your inputs for further improvement are very much desirable.

The objectives of this survey are:

- To get valuable suggestions for reviewing our vision, mission Program Educational Objectives (PEOs) and Program Specific Outcomes with reference to Program Outcomes stated by NBA.
- To get the feedback of our teaching learning process & environment established for attainment of PEOs, PSOs and POs.
- To identify gaps related to infrastructure, facilities, learning resources, and continuous updating to bridge these gaps.

ANNEXURE-I

A.
Vision of the Institute

To create knowledge
based society with scientific temper, team spirit and dignity of labor to face the global competitive challenges

B.
Mission of the Institute

To evolve and develop
skill based systems for effective delivery of knowledge so as to equip young professionals with dedication & commitment to excellence in all spheres of life

C. Vision of the Department:

To be a model of excellence in
Professional Education and Research by creating electrical engineers who are prepared for lifelong engagement in the rapidly changing fields and technologies with the ability to work in team.

D. Mission of the Department:

M1.
- To provide a dynamic environment of technical education wherein students learn in collaboration with others to develop knowledge of basic and engineering sciences.

M2.
- To identify and strengthen current thrust areas based upon informed perception of global societal issues in the electrical and allied branches.

M3.
- To develop human potential with intellectual capability who can become a good professional, researcher and lifelong learner.

E. Program Educational Objectives (PEOs)

PEO 1:
Graduates will have the ability to formulate, analyze and apply design process using the basic knowledge of engineering and sciences to solve complex electrical engineering problems.

PEO 2:
Graduates will exhibit quality of leadership, teamwork, time management, with a commitment towards addressing societal issues of equity, public and environmental safety using modern engineering tools.

PEO 3:
Graduates will possess dynamic communication and have successful transition into a broad range of multi-disciplinary career options in industry, government and research as lifelong learner.

F. Program Outcomes (POs)

PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability: Understand the impact of the professional engineering

solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics:
Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

G. Program Specific Outcomes

PSO1: Graduate possesses
the ability to apply fundamental knowledge of basic sciences, mathematics and computation to solve the problems in the field of electrical engineering for the benefit of society.

PSO2: Graduate
possesses the ability to professionally communicate and ethically solve complex electrical engineering problems using modern engineering tools.

PSO3: Graduate possesses
sound fundamental knowledge to be either employable or develop entrepreneurship in the emerging areas of renewable and green energy, electric and hybrid vehicles and smart grids and shall be susceptive to life- long learning.

you know, your institute is one of the pioneer institutes to impart pragmatic technical education. It's because of you all who could bring PCE to this status. The Institute is NBA accredited and ranked second by Rajasthan Technical Institution, Kota. Understanding, 'Success is not a destination, it's a journey', your inputs for further improvement are very much desirable.

The
objectives of this survey are:

1. To get valuable suggestions for
reviewing our vision, mission Program Educational Objectives (PEOs) and Program Specific Outcomes with reference to Program Outcomes stated by NBA.

·2.To get the feedback of our teaching
learning process & environment established for attainment of PEOs, PSOs and POs.

3.To identify
gaps related to infrastructure, facilities, learning resources, and continuous updating to bridge these gaps.

The respondent's email (**vj1885@gmail.com**) was recorded on submission of this form.

ANNEXURE-I

A.
Vision of the Institute

To create knowledge
based society with scientific temper, team spirit and dignity of labor to face the global competitive challenges

B.
Mission of the Institute

To evolve and develop
skill based systems for effective delivery of knowledge so as to equip young professionals with dedication & commitment to excellence in all spheres of life

C. Vision of the Department:

To be a model of excellence in
Professional Education and Research by creating electrical engineers who are prepared for lifelong engagement in the rapidly changing fields and technologies with the ability to work in team.

D. Mission of the Department:

M1.
- To provide a dynamic environment of technical education wherein students learn in collaboration with others to develop knowledge of basic and engineering sciences.

M2.
- To identify and strengthen current
thrust areas based upon informed perception of global societal issues in the electrical and allied branches.

M3.
- To develop human potential with intellectual capability who can become a good professional, researcher and lifelong learner.

E. Program Educational Objectives (PEOs)

PEO 1:
Graduates will have the ability to formulate, analyze and apply design process using the basic knowledge of engineering and sciences to solve complex electrical engineering problems.

PEO 2:
Graduates will exhibit quality of leadership, teamwork, time management, with a commitment towards addressing societal issues of equity, public and environmental safety using modern engineering tools.

PEO 3:
Graduates will possess dynamic communication and have successful transition into a broad range of multi-disciplinary career options in industry, government and research as lifelong learner.

F. Program Outcomes (POs)

PO1: Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and sustainability: Understand the impact of the professional engineering

solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics:
Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

G. Program Specific Outcomes

PSO1: Graduate possesses
the ability to apply fundamental knowledge of basic sciences, mathematics and computation to solve the problems in the field of electrical engineering for the benefit of society.

PSO2: Graduate
possesses the ability to professionally communicate and ethically solve complex electrical engineering problems using modern engineering tools.

PSO3: Graduate possesses
sound fundamental knowledge to be either employable or develop entrepreneurship in the emerging areas of renewable and green energy, electric and hybrid vehicles and smart grids and shall be susceptive to life- long learning.

ALUMNI FEEDBACK FORM

Dear Alumni,

Greetings from your own Alma matter!

As you know, your institute is one of the pioneer institutes to impart pragmatic technical education. It's because of you all who could bring PCE to this status. The Institute is NBA accredited and ranked second by Rajasthan Technical Institution, Kota. Understanding, 'Success is not a destination, it's a journey', your inputs for further improvement are very much desirable.

The objectives of this survey are:

- To get valuable suggestions for reviewing our vision, mission Program Educational Objectives (PEOs) and Program Specific Outcomes with reference to Program Outcomes stated by NBA.
- To get the feedback of our teaching learning process & environment established for attainment of PEOs, PSOs and POs.
- To identify gaps related to infrastructure, facilities, learning resources, and continuous updating to bridge these gaps.
