DETAILS OF ACTIVITY:

The Department of Advance Computing, Poornima College of Engineering, Jaipur, organized a Session on "Strategies for Achieving Gender Parity" 16 September, 2023. Achieving gender parity requires a multifaceted approach that includes several key strategies. First, advocating for gender-sensitive policies through workshops with policymakers can lead to the implementation of laws that promote equal pay and anti-discrimination measures. Educational programs aimed at raising awareness about gender inequality can empower communities, while mentorship initiatives connecting young women with established leaders foster professional growth. In workplaces, diversity training can help reduce unconscious bias, and supporting women entrepreneurs through grants and incubators encourages economic independence. Public awareness campaigns and engaging men as allies are crucial for broadening the conversation around gender equality. Additionally, promoting flexible work arrangements can support work-life balance, and networking events provide valuable connections for women. Specific initiatives in STEM fields can inspire girls to pursue these careers, while regular monitoring and evaluation of progress ensure accountability and inform future strategies. Together, these efforts can create a comprehensive framework for advancing gender parity across all sectors.

OBJECTIVE:

The objectives for achieving gender parity include advocating for inclusive policies that ensure equal pay and opportunities, enhancing education to raise awareness about gender issues, and fostering mentorship programs that connect young women with industry leaders. Additionally, implementing diversity training to reduce workplace bias, supporting women entrepreneurs through funding, and launching public awareness campaigns are essential. Engaging men as allies, promoting flexible work arrangements, encouraging girls to pursue STEM careers, and regularly monitoring progress are critical steps to create a comprehensive framework for advancing gender equality.
