Objectives

This session was conducted to discuss the subject Geotechnical engineering and its importance. It was headed over to recite the difficult topics of the subject. The session was conducted for the faculty members of all PGC campuses Civil engineering faculties organized at PCE seminar hall.

The objectives were:

- To discuss the subject content and preparation for the semester
- To recite the difficult topics among faculty members
- To had a two way interaction for better understanding the subject applications
- To remove the misconceptions regarding applicability of some topics.

ABOUT THE SESSION

Session was conducted as a part of a Faculty training Program conducted to improve the efficiency of the faculty members and to cure the lacking of the subjects. The session began with the general introduction of geotechnical engineering and its relation with geology. Then it included the unit wise description of the topic and its application in practical learning.

- The session followed the PMEPI philosophy
- The mode of session used the Power Point Presentation
- It covered all the unit wise topics and previous year subject discussion as well.
