ABOUT THE SESSION:

As a part of Alumni Interaction Programmers, Department of Mechanical Engineering organized a session on Alumni Interaction on **20th Jan, 2018**. Mr. Siddharth Jain presently working in Kamal Cognate Energy Pvt. Ltd. interacts with 3rd year (A+C) students on the topic of career in PSU's for energy production. The session started with the introduction of alumni with students. They shared their experiences and learning from their professional career and talked about the corporate expectations. They shared extremely positive memories of their favorite faculty members who enriched their lives during their time as students on campus. This was followed by the question and answer session, raised by the young minds. A strong bonding with the pass out students and commitment to excellence in every field has long been a hallmark. The teacher-student bond here is vibrant and robust. One consequence of this long tradition of excellence is a strong desire on the part of many alumni and to recall their student days on campus. Furthermore, students and faculty members form lasting bonds with students of pass out batches, and just as former students benefit from this rekindling so too do faculty members and students in the campus find this reconnection gratifying and fruitful.
