Indian English and its Global Context

Mamta Bhatnagar, Assistant Professor, Department of English, GLA University, Mathura
Nitin Bhatnagar, Prof and Head, Department of English, GLA University, Mathura

English was introduced in India as a tool of imperialism. The British left the country economically backward, though with a legacy of a language which grew further in decades by absorbing native nuances. The older variety of Indian English was more a property of elites, however, today it is not only in the process of acquiring a Lingua Franca status, but is also evolving with an individual identity among the World Englishes. The paper presents observations of some renowned linguists regarding their futuristic impressions on the growth of English in the India. It further studies the role of Indian English Literature in the acceptance of Indian English on the global level. It also explores the role of Indian culture, movement of Indians across the globe, Indian films etc. in giving Indian English an international colour. Finally, there is an attempt to assess the future of Indian English in the competitive market of World Englishes.

Reality of Life and the Irrational Sense of Sacrifice

It is a common practice the people give reference of the Mimetic theory given by Aristotle to understand the value of drama. Aristotle was prominent in showing that Catharsis is the real function of drama. In the post colonial time this theory has been replaced by the Epic theatre of Bertolt Bercht which is anti cathartic. According to this new theory, the only purpose of the play is not to generate pity and fear but to tell the audience cause and effect. In this paper I am trying to present Karhad who used the techniques of drama to create the same effect which this theory proposes where the spectator gets to know the pros and cons or effects and results. His plays Yayati and Bali are the major works which are based on the philosophy of this German playwright Bertold Bretch.

The Necessity of Flipped Classroom Method in English Language Teaching: A Study

Radha Devi Vadapalli and Dr.K.Kishore Varma
Associate Professor, Dr. Lankapalli Bullayya College of Engineering for Women

The students in modern times have access to the online classes, video tutorials and well-prepared study material and for this reason the traditional classroom lectures are becoming out dated in the New Age Education Scenario. In the light of such emerging trends in the field of education, this paper examines the feasibility of introducing an updated learning activity in the modern classroom scenario called Flipped Classroom Method. The FCM is a new method of reversing the traditional model of classroom in which a student is asked to take part in teaching activity. FCM provides all students an opportunity to use technology at home to explore, analyze, evaluate the assigned topics, then discuss and present the same in the classroom. In particular, this paper attempts to explicate how such flipped classroom can provide a platform for the students of English Language to develop their Communication Skills through practical involvement in teaching activity and also strengthen their personality through Peer Group Interactions.

About the Golden Jubilee Conference

THEME : RIGHT TO ENGLISH

English has had a tremendous impact on India and the Indian subcontinent over the last four centuries, and the end has come when we cannot wish it away from our lives. The impact is only too visible in our business, industry, education and all other essential aspects of life. Knowledge of English is the key to the prosperity of a few, but the need of the masses. It is essential to review our priorities and methodologies related to English Language Teaching in India. There is also the concurrent anxiety about the status of our own pluralistic linguistic base, which is unique, and closely bound to the variegated cultural matrix of our country.

The present conference is a sincere attempt to address these apparently contradictory aspects, and hence we have chosen the THEME Right to English. The Right to Education Act of (RTE 2009) implies the Right to English for all as well as proficiency in English has become a global imperative today. The desirability of learning English is no longer questioned, as English as become the lingua franca of the globalized world.

- How can English be taken to all?
- What kind of minimum knowledge of and proficiency in English should be aimed at?
- What methods and materials will help bring English to all at affordable cost and in reasonable time?
- How can promotion of English not be detrimental to the survival of native languages?

These and other pertinent issues will be discussed at the Golden Jubilee Conference of ELTAI with a view to bringing Quality English language education to all.

ASHRAE (American Society of Heating Refrigerating and Air Conditioning Engineers)

Dear ASHRAE Members of RAL and our guests,

On behalf of RAL CRC 2018 Organizing Committee, I am very happy to invite all RAL members, RAL officers, ASHRAE President and Staff to attend to The Chapters Regional Conference (CRC) meeting for Region-At-Large to be held between 4 – 7 October 2018 in Antalya, Turkey.

Antalya is the capital city of tourism not only in Turkey but also in the Mediterranean region with almost 300 five star hotels and the 3rd most visited city in the world for international tourists. So it is called as Turkish Riviera. Throughout Antalya's history of over 2200 years, the Romans, Phoenicians, Byzantines, Seljukian, and Ottoman civilizations have contributed to the heritage of the city. Today the city shares this glorious history with tourists from across the globe with an international airport directly connected with points all over the world. I hope you will take advantage of the many opportunities to enjoy the beauty of Antalya and its surroundings during your trip.

Also I am very delighted to inform you that The Union of Turkish HVAC&R Exporters (ISIB) annual meeting will be organized in the same hotel on the same dates. So you will be altogether with exclusive and distinguished Turkish HVAC&R experts, scientists and engineers whole week to get a cooperation for future projects and to improve our existing knowledge and networking skills.

As you know that this event is being held under different theme every year. The technical program for the CRC will be titled *"Building our NEW energy future"* this year. This is in line with the Society theme for the year which is the incoming President Sheila Hayter theme.

OBJECTIVES OF THE FDP

The aim of this Faculty Development Programme (FDP) is to provide exposure to faculty members, practicing engineers, and students to the concepts of Future Technologies of Renewable Energy & Smart Micro-grids (FTRESM). This course begins with an overview of renewable energy sources, their futuristic technologies and smart micro-grids schemes.

The geographical map of India provides us tremendous potential to tap the wind energy available along the long coast line and solar energy is almost uniformly available in most of the parts of the northern India. The initiatives taken by the Ministry of New and Renewable Energy (MNRE) to achieve the target of solar energy might be 100 GW and wind energy is 60 GW out of 175 GW from renewable energy by 2022, which provides a huge opportunity to all the stakeholders working in this area.
