A REPORT ON EXPERT LECTURE

TITLE AND DURATION: “IoT based Smart Aquaponic System” on 20 November 2022.

SPONSORS & SUPPORTERS: MoU - PCE and VIBHA BHARTI

ORGANIZER(S): Department of Electronics & Communication Engineering, Poornima College of Engineering, Jaipur.

EXPECTED OUTCOMES:

CO1: Students will be able to develop an understanding of the principles and technology of an IoT-based aquaponics system.

CO2: Students will be able to design, build and operate an IoT-based aquaponics system.

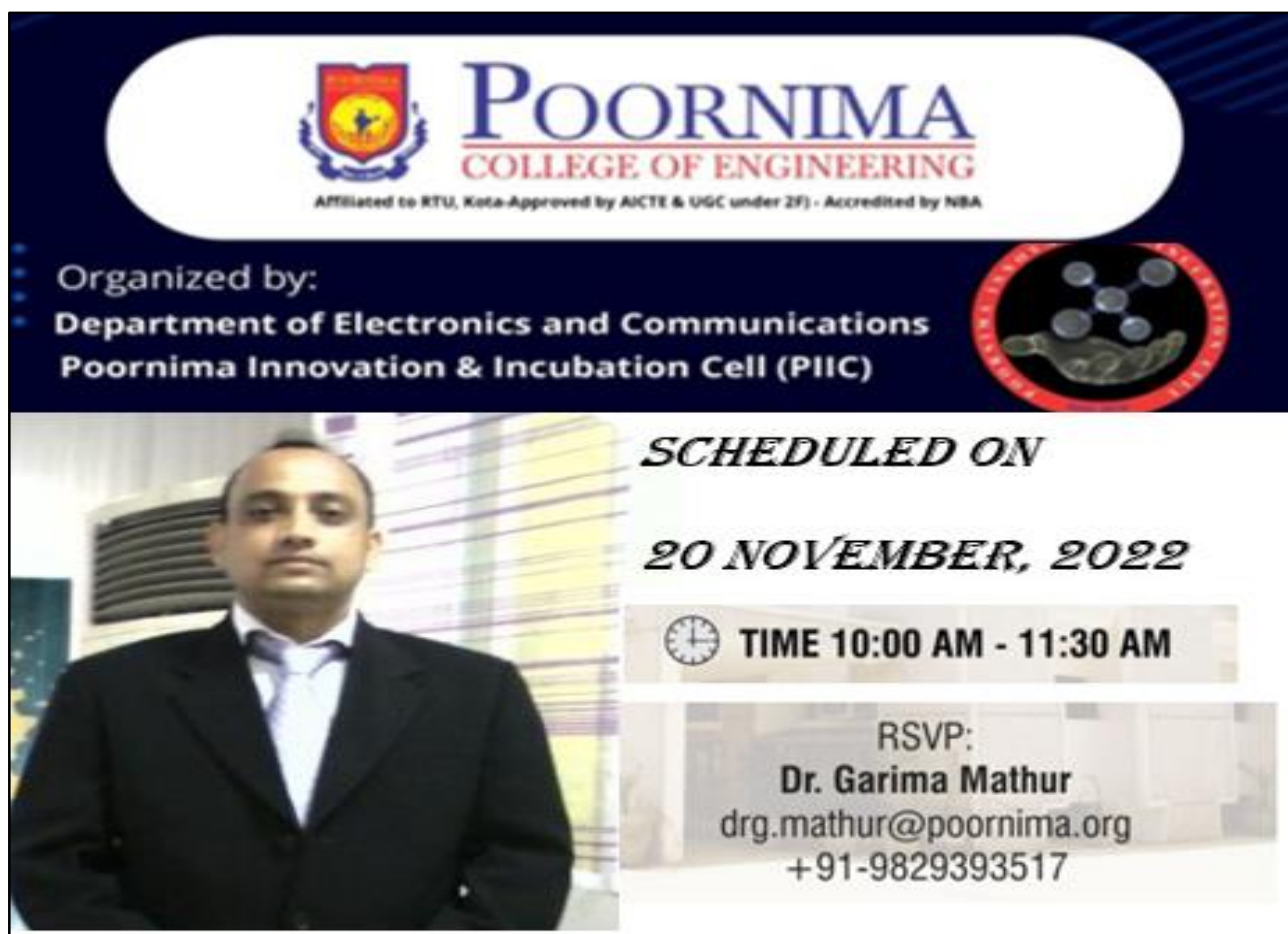

CO3: Students will be able to identify and troubleshoot common problems with an IoT-based aquaponics system..

DESCRIPTION OF EVENT:

The Internet of Things (IOT) is the next wave, world is going to witness. Today we live in an era of connected devices (mobile phones, computers etc.), the future is of connected things (Eg: home appliances, vehicles, lamp-posts, personal accessories, your pets, industrial equipment and everything which you use in day-to-day life). Internet of Things is a term given to the attempt of connecting objects to the internet and also to each other - allowing people and objects themselves to analyze data from various sources in real-time and take necessary actions in an intelligent fashion. The talk highlighted various aspects of the Internet of Things. The speakers covered a wide range of topics including how to design clothing and architecture for IoT, exploring IoT's potential applications while addressing security threats, and providing insight into the exponential advancement of technology and what we can expect from the future of the internet.

- Providing an opportunity for participants to enrich their knowledge and skill in developing various solutions for solving engineering problems in the society.
- This Talk serves as a platform for students to interact on cutting edge technologies in IoT.
- To Identify research opportunities in IoT technology, applications and services.

- To Form a research and development community with cross disciplinary collaboration, including business, communication, Nano electronics, micro systems, information systems, and software, with a focus on challenges in IoT issues.

ABOUT THE SPEAKER
